Transforming Hospitality Sustainably

Reloopd's RPF (Recycled Polyester Fabric) line offers **premium hotels a range of sustainable textile products** that directly replace common hospitality SKUs without compromising on quality or aesthetics.

All items are made from recycled plastics, and certified for safety and sustainability (e.g. OEKO-TEX® Standard 100 for no harmful substances, and GRS for verified recycled content). Below we present key product categories – **F&B/Tabletop, In-Room Amenities & Textiles, Guest Daily Use, and Fabrics for Furnishings & Fixtures** – highlighting example SKUs, technical specifications, and comparisons to conventional hotel products in terms of performance and price.

IMPACT & OPS ADVANTAGES OF RPF OVER VIRGIN MATERIALS

30–60% less Greenhouse Gas Emissions · 40–70% less Energy · 20–70% less Water use · Crafted by local women artisans (supports women's income generation and skill development)

Quick-dry · Colorfast · Low-lint · Bleach-safe · Wipe-clean · Long life

High Performance · Water- Fire- Mold- Resistance · Stainproof · Durable · 3x more washes

Cloth Napkins

45 × 45 cm (customs available)

1180–220 gsm, plain/twill weave

Smooth, cotton-like, crisp fall,
de-wrinkles easily colorfast

advantages over cotton/poly:
2–3× cotton wash-life, low lint,
quick-dry, crisp fold.

Tablecloths

152 × 305 cm (custom available)

200–230 gsm, plain/spun weave

Crisp, elegant drape, easy de-
wrinkling, colorfast surface suited
to premium dining

Advantages over cotton/poly:
more stability, reduced press
time, low shrink, colour
consistency.

Future Expansion

The above catalogue showcases SKUs that Reloopd can confidently supply now without extensive R&D or custom weaving. All these items use readily available recycled fabric types and straightforward manufacturing.

Looking ahead, Reloopd can expand into higher-specification textiles as hotel demand grows. This could include different GSM variants, specialized weaves (jacquards, higher thread-count blends), performance-layered fabrics (e.g. waterproof lined items, flame-retardant drapery). Once minimum order quantities are met to justify development, even products like apparel, bed linens, and towels made from recycled fibers could be offered.

In summary, VRF/Reloopd is helping hotels start with easy sustainable swaps today, with the capability to “close the loop” on more textile categories in the future as the partnership and volumes expand.
