LILAH: Acute Myeloid Leukemia. That's what the doctor said. I'm young but I knew when he said acute he wasn't talking about my sweater. It sucked before I knew I had cancer. I was tired all the time and I couldn't breathe. But once I got the diagnosis...it sucked even more - because now not only was I tired and out of breath I got to add vomiting and hair loss to the list. I remember when I was fifteen and couldn't wait to get my driver's license - six months seemed like forever. Now, six months seems like a blink.
