## Overview

Odie On Sol Memecoin (Odie) is a community-driven, decentralized token minted on the Solana blockchain. Combining the power of NFTs and the characteristics of a meme coin, Odie offers unique advantages and some associated risks.

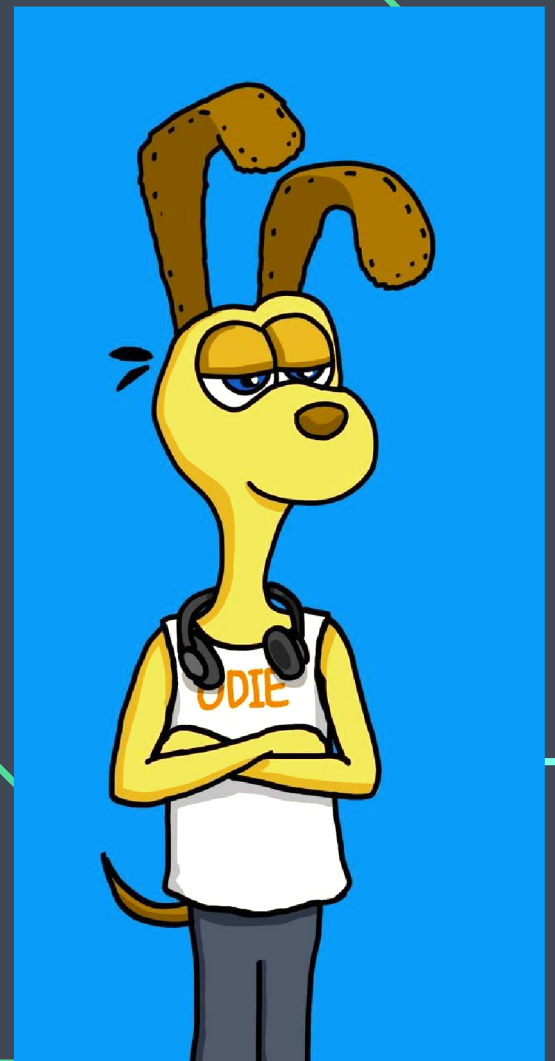

1. Odie provides a fun and novel way for investors to dabble in the world of cryptocurrencies and NFTs. The creation of the token has significant meaning to the DEV. After being rugged too many times on solana from various memecoins, the DEV said enough is enough. Odie doesn't deserve to be looked at like this for the rest of his existence on the blockchain. Once something is put there it lasts forever. To date there had only been rugged and scammed communities by odie and garf launched tokens. Odie was launched to revive and help provide life to these communities with one common goal, everyone can succeed in this space. This being the case Odie is the ultimate underdog in this space. He has been his whole life. Never given credit for his abilities, Odie is on a mission to prove he belongs next to the top dogs in crypto. Odie will provide long-term value to his holders.

# Tokenomics

Odie has a limited supply cap of 1,000,000,000 tokens. Odie will implement a deflationary system, which includes regular burns and a decreasing supply schedule. This is designed to create a supply-demand imbalance and potentially increase the token's value over time. Odie through team buys and burns as well as community retirements of the currency aims to achieve a circulating supply of 777,881,978.

Odie is built on the Solana blockchain, known for its fast transaction speeds and low fees. This adds to the efficiency and scalability of the Odie token, allowing for quick and cost-effective transactions. There will be taxes on the NFT's which will burn Odie as well as provide solana staking rewards

## Future Developments

Odie has a robust roadmap for subsequent development phases. This will include the launch of Odie On Sol clothing line followed by hand drawn NFTs! Your Odie tokens will act as boosters to staking rewards when used with the NFT during staking.

These future developments are designed to add long-term value to the Odie ecosystem and provide further investment opportunities for its holders. The memecoin alone with Odie is enough to make it successful, yet we intend to provide longterm value to make sure his journey on the blockchain is successful. Odie started his journey as the ultimate underdog in the crypto space. Odie has two sides! One view of Odie is the way the public sees him. Odie here is viewed as small, incapable and insignificant. Odie has a second side and this view comes from how his competition begins to see him. As Odie views himself as well! He has no quit! He will prevail and his strength will build it all!

This was Odie's perfect chance to step up and make a difference! With his friendly and loving nature Odie will show what trust and hard work can do for a community! Odie is the underdog and is always taken lightly. This will all change. Odie is a moon mission! Odie wants to take you on the ride!

Odie will make dreams come true. Odie will build massive value behind his memecoin to ensure its growth! Odie will create jobs and opportunity for people to live out their dreams in the process! Odie will find a band to perform its songs in concert! Odie will build out a clothing line! Odie will build out an online selling platform which incorporates PSA and BGS rated memorabilia and trading cards! Odie has now partnered with SKOL token and even aims to be integrated into P2E gaming and the METaverse. ODIE IS GOING PLACES! Odie is a long term project packed with the fun of a memecoin launched in the most underdog way
