

TEFRA Insurance

What is TEFRA?

TEFRA is a secondary insurance that can provide coverage for children who have more medical expenses than their insurance covers. We recommend TEFRA for all our patients that need that have high out of pocket costs with their current insurance. The monthly premium is affordable and pays deductibles, copays, and co-insurances that your insurance will not cover.

Would I qualify for TEFRA?

Most children that qualify for speech therapy or more than one therapy service qualify for TEFRA.

What would my monthly premium be?

“Monthly premiums are based on a family’s household size, the number of people living in the household, and the annual income as reported to the Internal Revenue Service. Families can deduct \$600 for each dependent child living in the home, along with excess medical and dental expenses as shown on Schedule A of the parents’ federal tax returns.”
