

Smart, Sustainable Business with

STERIL-AIRE®

Pure Air. Real Science.™

Your HVAC system is an excellent breeding ground for mould, bacteria and viruses as well as the conveyor of contaminated air throughout the building. Contaminated systems have been linked with sick building symptoms such as allergy, asthma and respiratory illnesses that are directly related to increased absenteeism, reduced productivity and increases liability.

Before UVC

After UVC

Key to reducing these biological contaminants is the elimination of biofilm on coils and in drain pans. Steril-Aire UVC Emitters™ use germicidal ultraviolet energy to eradicate both surface and airborne micro-organisms.

By providing safe, continuous cleaning of coil and drain pans, Steril-Aire UVC Emitters™ improve heat transfer and airflow for operational efficiency and energy savings. UVC Emitters also keep your building and building occupants healthy while reducing energy consumption, maintenance costs and improving your bottom line.

Steril-Aire can help you to achieve your triple bottom line — save energy, money and the environment.

Steril-Aire believes that buildings are for people. Our goal is to make buildings healthy. That's what smart, sustainable business is all about.

Many UVC products claim to work as well as Steril-Aire. Steril-Aire's multipatented UVC Emitters are the only UVC devices that are systems-engineered to work in the cold, moving air of HVAC systems. They have been independently tested and deliver up to six times the output of other ultraviolet devices.

You can count on Steril-Aire UVC Emitters™ to work better and last longer.

Steril-Aire is the HVAC - IAQ Leader in High Energy UVC Emitters™

Steril-Aire offers powerful UVC solutions and specialty products that meet industry-specific needs. Steril-Aire UVC Emitters™ can be factory or field installed in new systems or easily retrofitted for almost any HVAC system. Steril-Aire delivers the best solution for you.

Steril-Aire Solutions

UVC Emitters

DE Emitter™
SE Emitter™
SEN Emitter™
SteriLight™
Unitary Kit™

Specialty Products

SterilWand™
RIDS™
Steril-Zone™ Room Air Purifier

UVC Kits for:

Air Handling Units
Fan Coil Units
Unit Ventilators
Mini-Splits
Packaged Units
Heat Pumps

Industry Profile

Offices
Hospitals
Laboratories
Factories
Light Commercial
Food Processing
Education
Clean Rooms
Residential
Multi-family housing
Hotels, resorts and casinos

THE BENEFITS

Here's how you can benefit with Steril-Aire solutions:

- Cleans air - destroys mould, bacteria and viruses
- Reduces HVAC energy costs - savings up to 30%
- Reduces hospital acquired Infections, hospital stays and drug costs
- No more manual coil cleaning - no chemical costs
- Destroys Flu and SARS viruses, TB, Legionnaires' Disease
- Reduces absenteeism and increases productivity
- Saves maintenance, labour and material costs
- Improves HVAC system efficiency and performance
- Achieving 'Pay Backs' in under 12 months

And, Steril-Aire solutions have contributed towards Green Building accreditation worldwide.

"We estimate a conservative 28% drop in total A/C system energy usage".
