Social Science Research and Evaluation (SSRE) will conduct a confidential focus group with parents of Lynnfield Middle and High School students. We are seeking a representative sample of 16 participants per group with parents that have children in each grade 5-12. The goal of these focus groups is to help A Healthy Lynnfield better understand parent perspectives of youth and community substance use. This information will help inform our prevention programming. **Registration is required through a brief phone screening** to ensure representation by grade.
