

IN STOCK INVENTORY CURRENT AS OF 5.28

Please Refer to Additional Notes Below!

INVENTORY CHANGES RAPIDLY! These are all in stock as of May 28th but once gone - gone until restock!

We receive multiple plant deliveries EVERY WEEK from mid-April - late September with varied offerings weekly.

Please note that plants are grown with natural rhythms, not greenhouse forced and so some are not available until late spring/summer.

This is NOT a real time inventory! Check in advance if you are looking for a particular species and are traveling from a distance.

Links to plant descriptions are provided to assist you with your planning

We recommend conducting additional plant research to ensure plants are a good fit for your space and needs

Many NE native varieties are grown from Northeast collected seed (typically Long Island and Connecticut)

Looking for a variety or size you don't see? Doing a project and need large quantities, or plants for a specific time frame?
