

IN STOCK INVENTORY CURRENT AS OF 9/3/26

Please Refer to Additional Notes Below!

INVENTORY CHANGES VERY RAPIDLY! These are all in stock as of September 3rd but once gone - gone until restock (often within just a few days)

We receive multiple plant deliveries EVERY WEEK from mid-April - late September with varied offerings weekly.

Please note that plants are grown with natural rhythms, not greenhouse forced and so some are not available until late spring/summer.

This is NOT a real time inventory! Check in advance if you are looking for a particular species and are traveling from a distance.

The species list below includes plants on hand that are Native to the Northeastern United States

We also have a small number of non-native flowering perennials including Calamintha, Salvia, Crocosmia, Lavender, and Alliums

Links to plant descriptions are provided to assist you with your planning

We recommend conducting additional plant research to ensure plants are a good fit for your space and needs

Our selection includes plants native to New England and to the broader Northeastern US

We carry the area's largest selection of straight species natives but also stock some native cultivars - match plants to your goals

Many NE native varieties are grown from Northeast collected seed (typically Long Island and Connecticut)

Looking for a variety or size you don't see? Doing a project and need large quantities, or plants for a specific time frame?
