

IN STOCK INVENTORY CURRENT AS OF 9/23/26

Please Refer to Additional Notes Below!

As we welcome autumn and cooler weather our in stock inventory is beginning to wind down! The list below reflects plants on hand as of the date noted above. Once they sell - they are gone and unlikely to be restocked this season.

Please note that we are still accepting special orders - contact us or stop by to discuss.

This is NOT a real time inventory! Check in advance if you are looking for a particular species and are traveling from a distance.

The species list below includes plants on hand that are Native to the Northeastern United States

We also have a small number of non-native flowering perennials including Crocosmia and Sea Holly

Links to plant descriptions are provided to assist you with your planning

We recommend conducting additional plant research to ensure plants are a good fit for your space and needs

Our selection includes plants native to New England and to the broader Northeastern US

We carry the area's largest selection of straight species natives but also stock some native cultivars - match plants to your goals

Many NE native varieties are grown from Northeast collected seed (typically Long Island and Connecticut)

Looking for a variety or size you don't see? Doing a project and need large quantities, or plants for a specific time frame?

Outreach to discuss special order options!
