

Links to plant descriptions are provided to assist you with your planning

We recommend conducting additional plant research to ensure plants are a good fit for your space and needs

INVENTORY CHANGES RAPIDLY! These are all of the different varieties we will have available throughout the season - but not all at once.

We receive multiple plant deliveries every week from mid-April - late September with varied offerings weekly.

Please note that plants are grown with natural rhythms, not greenhouse forced and so some are not available until late spring/summer!

This is NOT a real time inventory! Check in advance if you are looking for a particular species and are traveling from a distance.

Many NE native varieties are grown from Northeast collected seed (typically Long Island and Connecticut)

We often have items not on this list when we are able to unexpectedly source them from our growers. Shop often for best selection!

Looking for a variety or size you don't see? Doing a project and need large quantities, or plants for a specific time frame?

Outreach to discuss special order options!
