| As we welcome autumn and cooler weather our in stock inventory is beginning to wind down! The list below reflects plants on hand as of the date noted above. Once they sell - they are gone and won't be restocked this season. |                                                       |                 |                        |
| Please note that we are still accepting special orders - contact us or stop by to discuss.                                                                                                                                      |                                                       |                 |                        |
| This is NOT a real time inventory! Check in advance if you are looking for a particular species and are traveling from a distance.                                                                                              |                                                       |                 |                        |
| The species list below includes plants on hand that are Native to the Northeastern United States                                                                                                                                |                                                       |                 |                        |
| Links to plant descriptions are provided to assist you with your planning                                                                                                                                                       |                                                       |                 |                        |
| We recommend conducting additional plant research to ensure plants are a good fit for your space and needs                                                                                                                      |                                                       |                 |                        |
| Our selection includes plants native to New England and to the broader Northeastern US                                                                                                                                          |                                                       |                 |                        |
| We carry the area's largest selection of straight species natives but also stock some native cultivars - match plants to your goals                                                                                             |                                                       |                 |                        |
| Many NE native varieties are grown from Northeast collected seed (typically Long Island and Connecticut)                                                                                                                        |                                                       |                 |                        |
