

# Determining research priorities for young women with breast cancer: a priority setting partnership

Alysha Keehn, MD, MSc, PhD student, PGY-3 General Surgery  
Department of Surgery | Department of Community Health Sciences | University of Calgary

## Young Women with Breast Cancer

Unique considerations      More aggressive disease

Genetic counselling      Delayed diagnosis

Early menopause      Nodal & metastatic involvement at diagnosis

Prophylactic surgery      Poorer survival outcomes

Sexual dysfunction      Fertility

Lack of age dedicated research

## Patient-Oriented Research

## Giving those affected a voice in the future research agenda
