EXTREME PRO

Tested by professionals on  
and off road, designed for  
those who live in the saddle.

FAST

It is a garment designed for  
cyclists who want to wear  
technical but practical fabrics.

ACTIVE

It is an extremely versatile  
garment thanks to its wide  
range of use. Essential: every  
detail of Active has been  
designed by Northwave Lab  
to offer the priceless feeling  
of freedom desired by every  
cyclist.

PADS FEATURES

EXPLORER

120 kg/m<sup>3</sup>

60 kg/m<sup>3</sup>

OPEN CELLS

It's called Explorer, and just like a true explorer it adapts to all weather conditions. Milled and coupled to a soft microfibre, it provides support and comfort in the saddle. The holes in the mesh material favour transpiration in the most extreme conditions and have record drying times. Its particular structure with open cells of 3 different densities guarantees excellent support over long distances (60 kg / m<sup>3</sup> for better comfort and 120 kg / m<sup>3</sup> density with high absorption of vibrations and shocks).

FREEDOM

TWO-LAYER CONSTRUCTION

FAST-DRYING MICROFIBRE

Freedom, the new milled and sewn pad, is made of soft, fast-drying microfibre with a sanitised bacteriostatic treatment. The characteristic two-layer construction guarantees support and comfort in the saddle.

WOMAN

FAST-DRYING MICROFIBRE

TWO-LAYER CONSTRUCTION

Freedom Wmn is milled and sewn with soft, fast-drying microfibre, providing saddle support and extreme comfort. The characteristic 2-layer construction guarantees excellent support over long distances.

ADVENTURE

GEL INSERTS

TWO-LAYER CONSTRUCTION

Adventure Gel is Northwave Lab's answer to the many cyclists who seek comfort above all and need significant support in the groin area, especially after many hours in the saddle. Adventure Gel is the pad with gel inserts in soft microfibre with a sanitised bacteriostatic treatment and two-layer construction (first layer: 65/3.5mm + 3mm hole + Lycra jersey; second layer: 100/10mm)

I'M A PRO

Tested by professionals on and off road, designed for those who live in the saddle. Extreme Pro is the new bibshort designed by Northwave Lab. Its tailored cut is the secret behind the exceptional fit that Extreme Pro has on all those wearing it. Experienced cyclists will love this bib simply because it offers everything a rider wants: versatility and support.

The pad. It's called Explorer, and just like a true explorer it adapts to all weather conditions. Milled and coupled to a soft microfibre, it provides support and comfort in the saddle. The holes in the mesh material favour perspiration in the most extreme conditions and have record drying times. Its particular structure with open cells of 3 different densities guarantees excellent support over long distances (60 kg / m3 for better comfort and 120 kg / m3 density with high absorption of vibrations and shocks).

Materials. The microfibre straps are lightened by breathable perforations, the lumbar panel and rear area are made of Freshfeel mesh, a material with a 3D structure that is elasticised and extremely breathable. The bib has a wide layer on the thighs in Revolutionary™ Energy technical fabric. Its modelling power ensures excellent muscle compression and helps reduce the production of lactic acid, avoiding the consequent muscle soreness. Power Check® fabric has been chosen for the groin area. Its characteristic structure with an orthogonal design confers greater resistance to abrasions and pilling; the extraordinary elasticity combined with its breathability, capable of drying in record time, make Extreme Pro the ideal bibshort for all cyclists looking for maximum performance and technicality, from the first moments of each ride to the very last seconds.
