ENGINEERED FOR THE WIN

Northwave is, among the athletes and enthusiasts of XC, the brand a symbol of innovation, technology, performance and a lot of victories. The Ghost Pro shoes have achieved many great results, thanks to the Northwave athletes who have always appreciated the lightness (just 312 g), the construction of the unidirectional carbon outsole that allows to “unload to the ground” all the power and, again, the possibility of a millimetric fit thanks to the X-Frame2 upper construction and the 2 dials.

The top of the line model of the NORTHWAVE XC collection is dedicated to professional XC athletes and to those who love racing on track, where every pedal stroke can make the difference and where every downhill requires maximum control.

FEATURES:

Hyperlight XC sole made of 100% unidirectional carbon with a stiffness index of 14.0 for top power transfer 28% more abrasion resistant than TPU, the Michelin rubber inserts with dual-layer compound technology provide excellent grip with minimum weight

Made with the patented XFrame 2® construction, the upper transfers every watt of power while providing the snuggest, even fit with no pressure points.

The double SLW3 dial differentiates the pressure between the top of the instep and the toe for even better adaptability

Highly abrasion-resistant ultrathin reinforcements ensure 360° protection along the entire upper

Integrated heel system containing directional fibre prevents any slipping

Pro Regular Fit footbed with a stiffened dual density design increases the power transfer

PUSH HARDER, DO IT FURTHER

Different terrains means a shoe able to adapt to every condition. During the climbing of difficult ascents and on fast and technical descents, typical of a Marathon race, you need a shoe that is extremely performing and that is able to meet the needs of the athlete. The XCM2, now renewed thanks to the introduction of the double dial, gives the long-distance MTB enthusiasts very high performance, with a wide range of use, the true secret of the Ghost XCM2.

AIM TO THE TOP

The feeling, from the first time you wear the Rebel 2, is of a complete wrapping of the foot. That makes the shoe comfortable and, at the same time, extremely versatile and performing on any type of terrain. The secret is the unibody construction of the upper, developed on the anatomy of the foot with the aim of becoming one only thing with the foot, the shoe and the pedal. You can feel the results since the first rides: the control of the foot during a down the hill rides is excellent and the comfort, even after many hours of use, is amazing.

EXPLORING HAS NEVER BEEN SO EASY

Northwave makes its debut in the Gravel world with a model designed for those who love travelling on two wheels. Rockster is adventure, freedom and comfort for all those who love to explore the world in the saddle. Rockster is a reliable, versatile and daring travel companion that you'll no longer be able to do without. The upper is equipped with micro-holes of different sizes in order to avoid compromising their resistance while also promoting breathability. The external microfibre layer has laser-cut micro-perforations that promote foot aeration even during the longest randonnées.

FEATURES:

Micro-perforated upper to guarantee ventilation and thermoregulation

TPU thermowelded toe and heel reinforcements increase abrasion resistance to ensure durability and resistance in the most demanding conditions

XC 10 Sole with a stiffness index of 10.0. TPU inserts in strategic points ensure high traction and outstanding wear resistance

FLAT IS FUN

When Northwave decides to develop a new shoe, road, DH or flat model, they do it by using the best technologies, know-how, and best partners. For a Flat model, the outsole is the most important component; this is why the choice was to rely on soles by MICHELIN, the best brand partner for the development of customized tread compounds and design. The Clan shoe is, indeed, designed to be an excellent compromise between rigidity - to ensure control of the foot on the pedal - and comfort - for long days spent in bike parks or on "freeride" routes.
