SIMPLY THE ULTIMATE ROAD SHOES

Designed to boost your strength. Thanks to the exclusive Powershape® system on the arch of the foot, every single watt of your physical power will be transferred where you need it: on the pedals.

FEATURES:

Made from 100% unidirectional carbon, the PowerShape Carbon 15 sole features the exclusive Powershape® system on the arch of the foot that ensures 100% of rider power is transferred to the pedals without wasting any energy. With a stiffness index of 15.0, this is the new performance benchmark for road soles

Speedplay adapter compatible for the lowest stack height between foot and pedal

Made with the patented XFrame 2® construction, the upper transfers every watt of power while providing the snuggest, even fit with no pressure points.

The double SLW3 dial differentiates the pressure between the top of the instep and the toe for even better adaptability

Integrated heel system containing directional fibre prevents any slipping

Pro Regular Fit footbed with a stiffened dual density design increases the power transfer

TECH: SLW3 CLOSING SYSTEM SPEEDPLAY XFRAME 2 Dyneema®

● EXTREME GT 2 80201020

\$334, 99

size	36/48
half size	39,5 / 45,5
weight	289 g

FEATURES:

Morph Carbon 12 AAS sole with full-carbon insert in the pedal area with a stiffness index of 12.0. The exclusive Anatomical Arch Support® made of TPU, allows the shoe to perfectly shape on the bow arch, making it the ideal sole for any type of foot

Speedplay adapter compatible for the lowest stack height between foot and pedal

Made with the patented XFrame 2® construction, the upper transfers every watt of power while providing the snuggest, even fit with no pressure points. The double SLW2 dial differentiates the pressure between the top of the instep and the toe for even better adaptability

Double SLW3 dial, the only dial with step-by-step and full release in a single button

Integrated heel system containing directional fibre prevents any slipping

Northwave Race footbed provides greater support

THE SNUGGEST FIT. ADAPTIVE SUPPORT.

Engineered for comfort coupled with efficiency. Experience an unparalleled secure zero-pressure fit thanks to Northwave's patented XFrame® construction. Designed with adaptability in mind, the Extreme GT 2 conforms perfectly to the contours of your feet with the exclusive TPU Anatomical Arch Support®. Complete with a carbon sole, the perfect shoe for those seeking high performance without compromising on a secure snug fit.

A BREATH OF FRESH AIR

This newcomer to the Northwave house is an absolutely new proposal in the road shoes scene. Mistral is like a breath of fresh air on the hottest days. Favoured by athletes in summer stage races, it's the ideal choice for long distance runners forced to endure hot asphalt over long distances... but not only. Mistral is the most comfortable solution for indoor training or to challenge friends on Zwift.

A BREATH OF FRESH AIR

The Northwave Lab designers know this quite well, reproducing the historic Tribute model with renewed style and functionality. The Morph Carbon sole with a carbon insert in the pedal area ensures the maximum transmission of power to the pedals. The Anatomical Arch Support® in TPU gives the arch a support point. The unibody ultra-light microfibre upper ensures a super comfortable, seamless fit. The two Velcro straps have been improved to offer an even more performing shoe, reducing the time needed to change shoes (swimming-bike, bike-running).

COLOR ALERT!
The new colorway proposed in SS21 for the Tribute shoes recalls the iconic advertising campaigns of the early 90s, when Northwave has been the first brand ever proposing unpaired colors for a pair of bike shoes. Dare to be bold with the new Tribute 2 Carbon black and white. Why choosing a color when you can have both on the same pair?
