

AFTERSHOKZ®

UNITING YOUR
MUSIC
+ MOMENTS

That's what has fueled our mission to develop truly revolutionary bone conduction headphones, with an open ear listening experience that brings powerful, dynamic audio without the traditional limitations.

The power of our brand lies in a single key concept: **be open**. We understand the importance of staying connected—from your music to your moments—without compromise.

Since 2011, AfterShokz has been committed to innovating unconventional products and making situational awareness a priority. We span the globe, reaching from East Syracuse, New York, all the way to Shenzhen, China, joined together on a mission: to enhance lives through our technology.

Freedom for your ears.

Trekz Titanium

Bone conduction technology

Delivers sound through cheekbones

OpenFit™ design

Nothing inside or covering ears

Lightweight titanium frame

Flexible and durable

Audrey Says™

Voice prompts

PremiumPitch+™ stereo sound

Dynamic audio and deep bass.

Sweat resistant - IP55 certified

Repels sweat and moisture

Wireless music and calls

Six hours of continuous play and talk

Additional features

LeakSlayer™ reduces sound leakage

Dual noise canceling mics minimize wind noise

Also available in a smaller size

TREKZ AIR

WIRELESS BONE CONDUCTION HEADPHONES 

The next generation of bone conduction technology is what's inside our lightest and most organically designed open ear headphones to date. We cut the bulk and used titanium everywhere possible to ensure they not only fit more securely but sound better too. Trekz Air are inspired by the demands of elite and aspiring athletes motivated by their music and their world.

FEATURES

A **20% lighter build** paired with a new **organic design** to increase comfort.

- 

PremiumPitch+™
Dynamic stereo sound and increased bass
- 

Complete Titanium Frame
Flexible and durable
- 

New Antenna
Improved Bluetooth® connection
- 

Open Ear Design
Delivers comfort and awareness
- 

Sweat Resistant
IP55 certified
- 

Wireless Connection
Bluetooth® V4.2
- 

Dual Noise Canceling Mics
Crystal clear calls
- 

LeakSlayer™
Reduced sound leakage
- 

6 Hours Music + Calls
Reliable battery life

COLORS

Sportz Titanium with Mic

Bone conduction technology

Delivers sound through cheekbones

Wired connectivity

12 hours of play time

Priced for everyone

Low cost, premium quality

OpenFit™ design never blocks or covers ears

Unmatched situational awareness and zero ear fatigue

Sportz Titanium with mic

Make and take calls

Inline controls

Bone Conduction Technology

Bone conduction is a natural part of the hearing process—sound travels through your eardrums and bones simultaneously. We've taken the concept to the next level through a suite of proprietary audio technologies and design patents.

- ① Our patented transducers create mini vibrations that travel through your cheekbones.
- ② The sound bypasses your eardrums, traveling directly to your inner ears (cochlea).

The result:

A reinvented listening experience, through an open ear design. Premium audio, situational awareness and extreme comfort—second to none.

Enhancing Lives

Though initially designed to make situational awareness a priority by simply freeing our ears, greater benefits were eventually realized. Listening to directional cues through headphones while hearing ambient noise is providing persons with blindness a more comfortable stereo experience and increases independent mobility. For those living with hearing loss, enjoying music or hearing in stereo sound can be a challenging, discouraging, or even painful experience—but bone conduction may offer a solution.

The value of tuning in to music, calls and other audio without traditional sacrifices can be life changing. We're honored we can contribute in some way.
