

# CYCLO

What the gravel market has been asking for: road pedal performance with mountain pedal functionality. Cyclo pedals are road pedals built around a mountain cleat allowing the use of mountain bike shoe while maintaining road pedal performance. A secure connection with tight coupling and tension adjustment ensures great power transfer, support and performance. Using our ATAC mountain bike clamping mechanism and cleat, the Cyclo pedal is perfect for gravel and adventure rides. Our well known easy entry system and self-cleaning design will allow this pedal to consistently perform in adverse conditions.

## CYCLO 10

- Carbon body
- Hollow steel axle
- Progressive tension adjustment
- ATAC cleat – 2 hole
- 128 grams
- SRP \$165

## CYCLO 6

- Composite body
- Steel axle
- Progressive tension adjustment
- ATAC cleat – 2 hole
- 134 grams
- SRP \$135

## CYCLO 2

- Composite body
- Steel axle
- ATAC cleat – 2 hole
- 147 grams
- MSRP \$90
