GLOVES

GLOVES

Completely waterproof yet highly breathable gloves, in a choice of patterns and colours, and in four sizes. Feel supremely confident in element repellent all weather gloves – manufactured with porelle® membranes as waterproof knitted recreational wear or work-wear.

Grip Control is critical, when participating in some recreational pursuits (motor-biking, cycling, climbing...). Reduce the risk of grip loss considerably by always wearing Dexshell gloves, making you feel 100 per cent in control. Keep your hands warm and protected as much as possible, by settling for nothing less than the very best. But don't be concerned now that insisting upon wearing Dexshell gloves means shelling out a king's ransom for premium quality gloves that are technically advanced, reliable and proven as being unquestionably element repellent – when you're riding, fishing, exploring, discovering... Dexshell gloves are sensibly priced, so that just about anyone can invest in a pair, and, for many years to come, get all the hand protection they need.

Like other Dexshell products, the gloves you purchase from us will come with a porelle® waterproof, breathable membrane in their construction; this serves as a barrier to water droplets finding their way through the outer layer, while still providing excellent breathable comfort for your hands: instead of sweating excessively inside your gloves, and finding it increasingly difficult to maintain control, you can enjoy yourself more in your chosen recreational pursuit, perspiring hands not serving as an irritating distraction.

ULTRALITE

The most dexterous and flexible DexShell waterproof knitted gloves with COOLMAX® FX liners. Touchscreen compatible.
