

Marine and Underwater Archaeology

Rob Field, BA, RPCA
Archaeologist and
Commercial Diver

British Columbia's archaeological sites on land and in the intertidal zones are protected under the *Heritage Conservation Act*. Protected marine site types include shipwrecks and aircraft crash locations, as well as submerged habitation, rock art, and burial sites. These sites may only be altered under the supervision of a professional archaeologist and under a permit, issued by the Archaeology Branch.

Kleanza offers British Columbia's only WorkSafe BC certified marine archaeologist. Rob Field is both a terrestrial and underwater archaeologist qualified to hold *HCA* permits. He is available to conduct: archaeological overview assessments, monitoring, and mitigation; underwater site surveys; site documentation; and, sub-aquatic and inter-tidal testing. Rob is also a skilled presenter, teacher, and technical writer.

Kleanza staff can provide underwater expertise on the following projects:

- Waterfront property assessment
- Shoreline erosion and seawall construction
 - Inter-tidal and shoreline remediation
 - Aqua culture development
- Port, harbour, bridge, and tunnel infrastructure development and repair
 - Sub-aquatic pipeline and cable installation
 - Oil and gas exploration
- Dock and wharf replacement and construction
