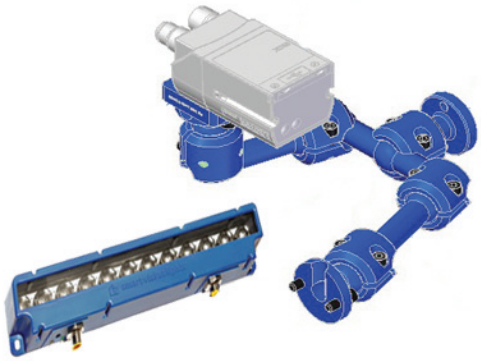
## 2D Machine Vision System

**Automate Complex or Mundane Visual Tasks**

**• Design/Quote • Installation • Integration**

Applications:
- Positioning
- Identification
- Verification
- Measurements
- Flaw detection



Enhanced Options:
- Expanded vision lighting
  - Amplify the elements
- "U" joint modular fixtures

- Industrial grade
- Advanced vision tools
- High-speed image acquisition
- Integrate w/ PC for operator interface
- Flexible work distance & field of vision
