Matt Sharp, Safety Coordinator

Safe Fleet/Elkhart Brass

1302 W Beardsley Ave

Elkhart, IN 46514

Dear Shawn,

We had a large amount of machine tools, such as drill presses, milling machines, and sanders that required machine guarding to reduce workplace hazards. We contacted PowerSafe Automation to help with solutions for these machines. They were quick to respond, came onsite and worked with our team on the initial concepts, fabricated the materials, and provided a quality installation of this guarding.

Their crew did a great job understanding our needs and providing great service. It has improved our workplace safety, and I would recommend their team to other plants looking for machine guarding solutions.

Sincerely,

Matt Sharp

Manufacturing Engineer/Safety Coordinator, Elkhart Brass
