 - Surge Protection
- ## Smart Integration
- ### Power Solutions
- Manage
 - Monitor
 - Control
 - Protect

Support multiple client locations from one single platform on your tablet, phone or PC

POWER DISTRIBUTION

RACK MOUNT + VERTICAL RACK MOUNT + WALL MOUNT + SINGLE OUTLET

Removable Surge Modules

The effectiveness of a surge protector weakens with every single surge. Instead of leaving your devices vulnerable or replacing the entire system any time it takes a hit, removable surge protection modules (MOVs) allow you to replace just the modules. The app lets you see their remaining life (Surge Mileage) so you can monitor the condition of the MOVs and replace as needed.

Intelligent Power

Unique power distribution that delivers surge protection, remote control, smart home integration, rack temperature management, and more. The individually controllable outlets have power metering, self-healing and automatic reboot capabilities for smarter remote management of your connected devices - All managed by an intuitive app that lets you control the system even without an Internet connection.

Manage Everything from One App

The intuitive MAVbase™ app design provides a simple user experience to manage connected devices. Integrators can monitor all of their clients with either remote or direct access.
