

DON'T MISS OUT ON THE KICK START PACKAGE

Harry Pontikis

18th May 2020

The Victorian government announced today \$2.7billion dollars to help 'kick start' the economy via the construction industry!

The projects are tipped to begin in the coming weeks and months with education, roads, and transport to be the areas to be 'pumped primed.'

There will be 10 new schools built, 57 schools upgraded and 250 relocatable school buildings built and installed.

The Road and rail network will be maintained improved and upgraded where appropriate as well as improving railway stations, toilet blocks and disability access to public transport.

Overall, this package provides a unique opportunity for businesses in the construction industry to focus on these opportunities or focus on gaps left by other companies who want to pivot towards these projects.

To do this, you need to ensure that your business has enough funds to be part of this 'kick start' initiative, have the staff and the processes and procedures to operate profitably. There are funds still on offer from lenders, but access is progressively getting harder.
