

# NEW PRODUCT DEVELOPMENT SERVICES

# **PACKAGE DEVELOPMENT SUPPORT**

Bottling day is not the time you want to find out that great looking package your team spent hours creating is not compatible with your bottling line. New package development can be tricky even under the best of circumstances. Let PackDyne help you avoid the pitfalls on the road to a successful package by:

- Reviewing your materials technical drawings
- Metrology testing
- Bottle fill testing for TTB compliance
- Bottling line auditing assessment for areas of incompatibility
- Work with your vendors and designers to facilitate understanding of package and line capabilities/compatibilities

## **DOCUMENTATION**

PackDyne will provide a technical report of their findings to you along with all supporting data allowing you to make an informed decision on your package.

# **YOUR PARTNER IN TECHNICAL SERVICES**

PackDyne Technical Services can help you reduce the risk of having to forestall bottling due to problems in package design. We want to make your bottling successful by assisting you in developing a package whose design meshes effectively with your bottling line capabilities.
