

Creating Value Through Critical Cybersecurity Services

MANAGED SECURITY SERVICES

SOC-as-a-Service (SOCaaS)

Building a SOC is expensive and time consuming. Keeping qualified security analysts to run it is a never ending merry-go-round. BAMCIS Cybersecurity's SOC-as-a-Service provides customers a world class SIEM with cybersecurity intelligence built-in and deployed on day one. Our experienced analysts are deployed in small teams to enable a greater intimacy with our customer environments. This combination provides our customers with the support they need to elevate and extend their cybersecurity capabilities by freeing up their time and resources to concentrate on the organization's most critical cybersecurity business issues.

Customer Experience

BAMCIS Cybersecurity engages proactively with customers, learning their business, taking initiative, and striving every day to be a true partner. Our approach is to offer continuous value. Our team has significant cybersecurity experience and understand the environments in which our customers operate. We work in small teams and focus on delivering practical, technologically innovative solutions that are centered on the customer experience. These are hallmarks of what differentiates us from our competitors. We believe that this is critical in driving the outcomes our customers desire.
