ISO 37000:2021

Governance of Organizations - Guidance Hybrid Course

Foundation Level

*"All ships
rise with the tide"*

Introduction

The International Organization for Standardization has published the first ever international benchmark for good governance with unanimous approval. The International Standard, ISO 37000, provides guidance for the governance of organizations and a common language for all sizes and types of organizations across jurisdictions.

ISO 37000:2021 - *“The pursuit of purpose is at the centre of all organizations and is, therefore, of primary importance for the governance of organizations. Good governance of organizations lays the foundation for the fulfillment of the purpose of the organization in an ethical, effective and responsible manner in line with stakeholder expectations.”*

Good governance not only builds trust, it improves business performance and contributes to social and environmental integrity. ISO 37000 provides governing bodies with the tools they need to govern well, such that their organizations can perform effectively while behaving ethically and responsibly.

This internationally accredited course consists of two components:

Modules in digital format:

- presented by the standard’s co-editor, Carolyn Chalmers
- provides an excellent foundational understanding of ISO 37000

Online Contact Sessions

- presented by highly qualified and experienced governance professionals

Digital Course facilitator

Carolynn Chalmers

Carolynn is an internationally recognized name in governance and a renowned facilitator on several aspects of governance. She has been involved since inception in the drafting of ISO 37000 and is one of the few people who can provide the history behind, and the intentions of, every aspect of ISO 37000. Carolynn also chairs the South African Bureau of Standards' technical committee responsible for this standard.

Online Course facilitator

Paul Dubal

Paul has a long history in corporate governance, with over 30 years experience working in professional services, senior in-house roles in regulated banking and finance companies, and as an independent governance consultant and coach. He has worked in UK, North America, the Caribbean and the Middle East and his current clients span the globe. Paul's international experience complements the approach of the Standard as an internationally recognised common language for good governance. As one of the few ISO 37000 certified practitioners in Canada, his focus is on using the Standard to improve governance across the range of entities and industries that can benefit from its principles. Paul is also a certified life coach, group coach and emotional intelligence (EQ) assessor and practitioner, and advocates that good governance is as much about conduct and behaviours as systems and processes. Paul's highly regarded book 'EQ for the Governance Professional,' explores the vast range of soft skills required of a successful governance practitioner.
