

## Governments Ban the Bottle

There is a growing trend in our country. City leaders from Ann Arbor, Michigan, to San Francisco are passing legislation banning purchases of bottled water by government agencies. The negative impact and growing cost of bottled water are driving this trend.

The American public is starting to get the message as well, that bottled water is expensive, has a negative impact on our environment and is often of lower quality than tap water. Sometimes costing more than gasoline, bottled water is often nothing more than filtered tap water from municipal sources. Additionally, water diverted from local aquifers for the bottled-water industry can strain

surrounding ecosystems, while the discarded plastic bottles are filling up landfills and leaching into the soil. The Earth Policy Institute estimates that the oil it takes to produce plastic bottles could fuel 100,000 cars. All of this waste and pollution is generated by a product that is often inferior in quality to local water sources.

Many people worry that tap water may contain a wide range of contaminants, such as lead, chlorine, cysts and sediments, many of which can pose health risks. Cure Water Systems offers several solutions for effectively and efficiently removing contaminants from your tap water, providing quality drinking water without adding to the environmental damage caused by the bottled-water industry.

Now more than ever, people want to live without damaging our planet. Water filtration systems offer you a green alternative to bottled water while saving money. Contact the professionals at Cure Water Systems to find the best solution for you.

## Food-Service Water Filters by 3M™

The 3M™ Water Filtration Products High Flow Series of commercial food-service products offers simple, effective and easy-to-install solutions that meet the volume, water clarity and maintenance expectations of restaurant owners, chain, fast-food and convenience store operators, supermarkets, cafeterias, and institutions.

3M™ High Flow Series can meet the filtration needs of an entire food-service establishment or address specific applications one at a time. With flow rates of up to 5 gallons per minute (18.9 lpm) for a single cartridge system they accomplish what was previously the job of a three- or four-cartridge system. If you are in food service, a 3M™ High Flow Series filter is the system you need.

Cold beverages are often the most profitable part of convenience stores, restaurants and quick-service operations. For these high-volume cold-beverage applications, High Flow filters deliver enough Recipe Quality Water™ to make more than 432,000 soft drinks (16 oz. soft drinks in 22 oz. cups) with a single cartridge. High Flow cartridge filters deliver the improved performance of Integrated Membrane Pre-Activated Carbon Technology (“IMPACT”) media.

A single-cartridge High Flow system replaces three- or four-cartridge manifolds, lowering capital expenditures and ongoing maintenance costs.

### WATER FILTERS FOR COLD BEVERAGE

Carbonator	Model	Part #	Replacement Cartridge	Capacity (Gal.)
Single	BEV140	56162-01	HF40 56133-03	25,000
Dual	BEV160	56163-01	HF60 56134-03	35,000
Triple	BEV190	56164-01	HF90 56133-03	54,000

BEV140, BEV160, BEV190 systems include *Integrated Membrane Pre-Activated Carbon Technology* (“IMPACT”) media for cyst and bacteria reduction.

All 3M filter systems deliver reduction of sediment and chlorine taste & odor.

**We carry the full line of 3M™ Water Filtration Products High Flow Series**

Cure Water Systems, Inc., was established in 1991 and specializes in hot-and-cold water filtration coolers, the green alternative to bottled water. Our company currently services more than 2,000 corporate accounts, as well as hundreds of residential customers, in New York, New Jersey and Connecticut. We have an established nationwide network which has enabled us to install and service equipment for hundreds of customers throughout the United States.

We offer systems that resemble bottled-water coolers, but instead of a heavy 5-gallon bottle on top we install our Cure Water filtration system on the back of the self-standing and countertop models. These systems bring delicious, refreshing filtered water right into your home or office. Both the countertop and self-standing models provide hot and cold water.

Call us at (212) 807-8888 to discuss the best solution for your needs.

**Go Green and Help Save the Planet!**

Water filtration coolers create far less waste than bottled water. It's the Earth-friendly choice!

# NO MORE BOTTLES!

## The Solution...Water Filtration Coolers

### Free-Standing Model 1

The stylish stainless-steel design fits any office decor. Enjoy freshly filtered water whenever you like.

12" W x 17" D x 39" H  
without filter 13" D

### Free-Standing Model 2 "Terminator"

Great in kitchens or offices, it features:

- Built-in cup dispenser
- Filtration mounted inside of cooler

13.5" W x 18.5" D x 40" H  
without filter 13.5" D

### Countertop Model 1 "Terminator"

Perfect for office kitchens and small spaces, this model provides delicious water for your office.

13.5" W x 18.5" D x 18" H  
without filter 13.5" D

Both of the Terminator Models are available with In-tank UV

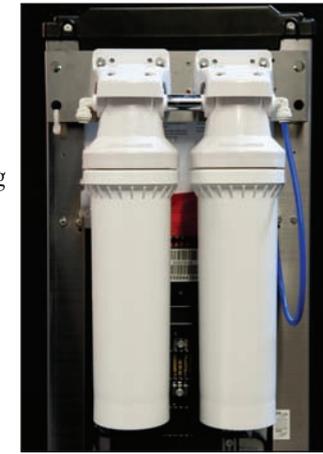

### In-Tank UV Sanitization

- UV light destroys bacteria
- Water flows over light upon entry
- Entry contact disinfection
- Nightly UV cycle

### CWSA-Double Filter System

The Cure Water double filter system is installed inside of the Free-Standing "Terminator" model or on the back of our other models. Our double filter system also is available for under-sink installations (as seen below).

9.5" W x 5" D x 16" H

### Under-Sink Filtration System

Enjoy great-quality filtered water from a separate faucet right at your sink. The Cure Water system uses double filtration technology.

9.5" W x 5" D x 16" H

### Everything Tastes Better With Filtered Water

Coffee & Tea • Prepared Foods • Ice

### Remote Cooling

We have an under-counter water chiller when space for our filtration cooler is not available. Install our chiller with the Cure Water triple filter system for delicious freshly filtered water at all times.

# CURE WATER SYSTEMS
