Other						

Other vaccines:

Please note that:

- #1.** This is a special examination and does not replace the need for a comprehensive physical examination and other immunization updates from your primary care physician.
- #2.** You will be tested for **Syphilis, Gonorrhea and tuberculosis depending on your age and risk level**. Positive test results will be reported to health dept per applicable laws, and you will incur further expenses if confirmative tests, additional evaluation or treatments are needed. Your I 693 forms may not be completed until then.
- #3. Immunizations:** It is important that you provide us with your prior immunization records. Immunizations play an important role in prevention of many communicable diseases. **See the immunizations required as above.** We recommend that you follow up with your personal physician to complete immunization series that may be appropriate to your age.
- #4.** Generally, your I-693 exam can be completed in about 4-5 business days. If your test results come abnormal, then it may take longer, and it may cost you extra.
- #5.** Once I 693 exam is completed, you will receive a sealed envelope and one set of copies for your records.
