

Primal Descriptions:

Prisma Jersey

A standard fit, designed to provide plenty of room in the ride position. Raglan sleeves are less restrictive in lower positions on the bike. With the lightweight, double knit-performance polyester fabric, riders stay comfortable and dry no matter their chosen route.

Evo 2.0 Jersey

For the competitive athlete, the Primal Evo Jersey contours to your body delivering a faster ride and sleeker look. Combining advanced features with lightweight Q3 fabric and mesh paneling, provides ultimate comfort and performance.

Evo 2.0 Bib

Features an anatomic, race-specific fit, and excellent compression Vero fabric allows for superior flexibility. A duo-base paneling system and flatlock stitching eliminate undesirable seams to redefine comfort on the bike.

Helix Jersey

Super stretchable, lightweight SLR Ion fabric and mesh paneling combined with an elite pro tour fit, makes it seem like the Primal Helix Jersey is a second skin. Technical features including aerodynamic Vortex panels and heavy duty exposed zipper give even the most advanced cyclist an edge on the competition.

Helix Bib

New and improved, the Primal Helix 2.0 still features the HX8 Carbon Italian chamois, designed to form to the body, provide superior comfort, prevent abrasion, and promote blood flow, but with the additional advantage of a laser cut silicone leg band that grips your thigh.
