

C&M SL-Series

All C&M SL-Series Products are UL 1088 Series Compliant

All C&M SL Series Products are UL Listed, demonstrating their high quality, reliability, and durability.

What is UL Listed?

- UL Listed products undergo rigorous testing by a third-party laboratory to ensure their quality and safety under different conditions.
- UL Standards are globally accepted as a gold-standard in safety and reliability, so you know the C&M SL-Series will perform as intended.

What is UL-1088?

- UL 1088 Standard is the applicable UL standard for Temporary Construction String Lights.
- This testing ensures compliance with Canadian CE code Part I CSA C22.1 section 76 and US NEC ANSI/NFPA 70, Article 590

How does UL-1088 differ from other UL Standards?

- Some String light products are listed under the UL-153 standard.
- This standard, for portable electric luminaires, outside the scope of temporary lighting strings (among other UL lists).
- This catch-all category provides lower use case specific certifications and assurances, including no testing and certification for Article 590 (the applicable ANSI code for temporary lighting)
