Workshop Descriptions

Stopped Contacts Primer...

Do you always come off the course asking did he get the contacts? Do you worry about the contacts before you even go in the ring?

Having independent contacts are so much fun! If you don't have to manage and worry about the contacts, it is so much fun to run and handle to course!

This workshop shows you the *homework* to get where you want to go!

Remember – we must TRAIN our dogs to do this, and training takes time. There is no magic dust (although I wish there was!)

Skills and Drills... How to handle the same sequence so many different ways!

Two Jumps and a Tunnel... So many skills and fundamentals can be learned from these 3 obstacles. So many combinations, so many challenges, so many skills to learn, so much fun!!!

WHY TRAIN WITH DONNA?

I have been training dogs professionally since 2001 and I have trained 9 of my own dogs to the highest titles in USDAA and AKC competition. I am forever a student of dog training and continuously attending workshops and seminars with both European and USA top handlers. While my dogs and I have had many personal successes, I am very gratified that my teaching has led to the success of many of my students whether in the competition agility ring or simply having the joy of connecting with their partner in a safe and fun agility class. Many references are available upon request.

MYTH BUSTERS ABOUT DONNA:

Myth: I only teach Border Collies and only like certain breeds.

Busted: Come and watch any class and you will see all breeds, large and small! Border Collies are my chosen breed but WOW there are a lot of great agility dogs of all breeds. My amazing students include: Golden Retrievers, Labs, Briards, Miniature poodles, Cavaliers, Briards, Papillons, Rotties, etc.

Myth: You won't learn CPE from Donna.

Busted: I teach AGILITY! So whether you are interested in AKC, CPE, USDAA, ASCA or any other organization, it is all agility and it should always be taught with the enjoyment and safety of
