

MAKO X

Experience what it's like to be the fastest predator in your environment with the 2019 Mako X. With IBO speeds reaching 364 fps, you're going to need a bigger trophy room! The Mako X has a fluid shot cycle, from draw to release it redefines shootability in a speed bow. This is the bow you are going to want to tell your friends about.

MOUNTAINEER X

The Mountaineer X unifies high quality performance with exceptional value! Xpedition, as a purpose driven brand, brings the best mid-price point bow to the market for 2019.

The Mountaineer X is a top performer and ready for the grind of the hunting season. The all new rotating mod XS-V cam allows the bow to reach IBO speeds of 340 fps. Archers will be impressed by the smooth draw cycle and overall ease to shoot. This bow is the definition of affordable performance.

XCURSION 6 HD

Originating from the 2014 Xcentric, the Xcursion HD series is the next progression in fast hunting bows! The original, award-winning bows allowed archers to experience the Xpedition Perfection.

New for 2019, both the Xcursion 6 HD and 7 HD models will be outfitted with the XS-HD cam system, a rotating cam/mod system. The traditional thinking has always been that to have the convenience and adjustability of a rotating mod, the archer had to give up a great deal of efficiency and speed. The Xcursion HD series shatters that perception with speeds in excess of 354 fps and 344 fps respectively. Shoot an Xcursion this season and find out why more hunters choose the Xcursion HD when the hunt is on the line.

PERFEXION XL

The Perfexion XL target bow comes with the PXT hybrid cam, designed by the most prolific cam designer in modern history, Kevin Strother.

The PXT dual limb stop hybrid cam has:

- Unprecedented 6" of draw length adjustment on one base cam
- 1/2" modular draw adjustment
- Xpedition signature adjustability

The Perfexion XL is fast enough for 3D with an 8"+ brace height. The bow has a smooth draw that target archers require at the range. The Perfexion XL's rigid riser defies flex and recovers with consistency. Engineered and assembled to make scores climb and X rings easier to hit!
