Canine Preventative Care Screening

Comprehensive testing helps to give a more complete picture of your pet's health. These tests often detect illness(es) that can't be discovered with a physical examination alone and provide invaluable medical knowledge about your pet.

Why is preventative care screening important?

- Your pet's blood values may change over time. These changes are often subtle, so test results may appear to be "normal".
- Every animal is unique, so it is important to know what a "normal" result is for your pet. By establishing your pet's baseline values during health, we have something to compare his or her results to on a yearly basis.
- Trending these results helps us diagnose problems earlier and we can respond quickly. Early detection leads to better outcomes, improved quality of life and lower treatment costs.

Preventative Care Screening Package Price (tests below included) = $159.00

- **Preventative Care Screening Includes:**
- Lab 4dx Plus (Reflex C6) = $83.00. Screens for tick borne diseases and heartworm disease. Also includes a quantitative lyme antibody test when applicable.
- Comprehensive Fecal Test = $58.00. Screens for intestinal parasites.
- Blood Chemistry Panel = $162.00. Screens organ function and SDMA (kidney biomarker).
- Complete Blood Count = $72.60. Check red/white blood cell counts and platelets.
- **Regular Total Cost for above testing = $375.60**
