# 1 Air Quality

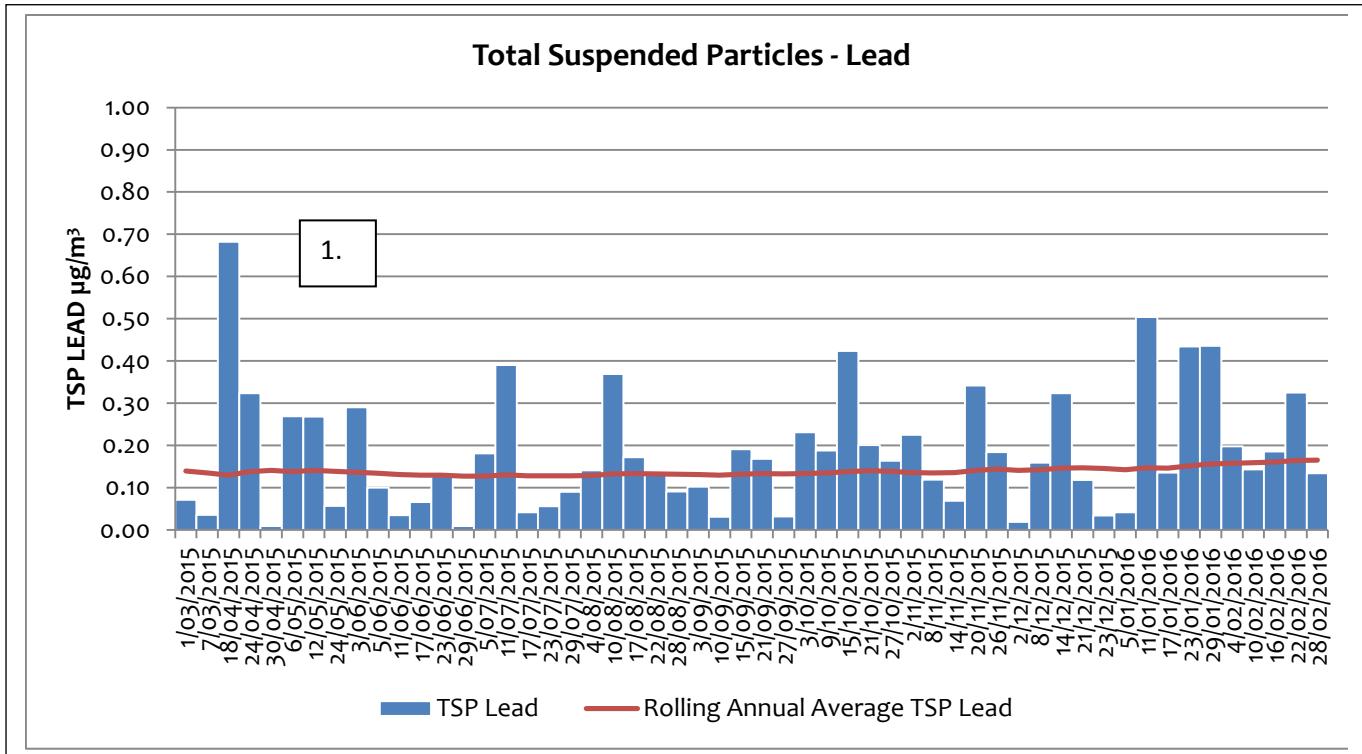

## 1.1 High Volume Air Samplers

### EPL10 - SILVER TANK - ON SITE

DATE	TSP ( $\mu\text{g}/\text{m}^3$ )	Lead ( $\mu\text{g}/\text{m}^3$ )
4/02/2016	39.30	0.20
10/02/2016	32.90	0.14
16/02/2016	34.70	0.19
22/02/2016	49.30	0.33
28/02/2016	35.20	0.13

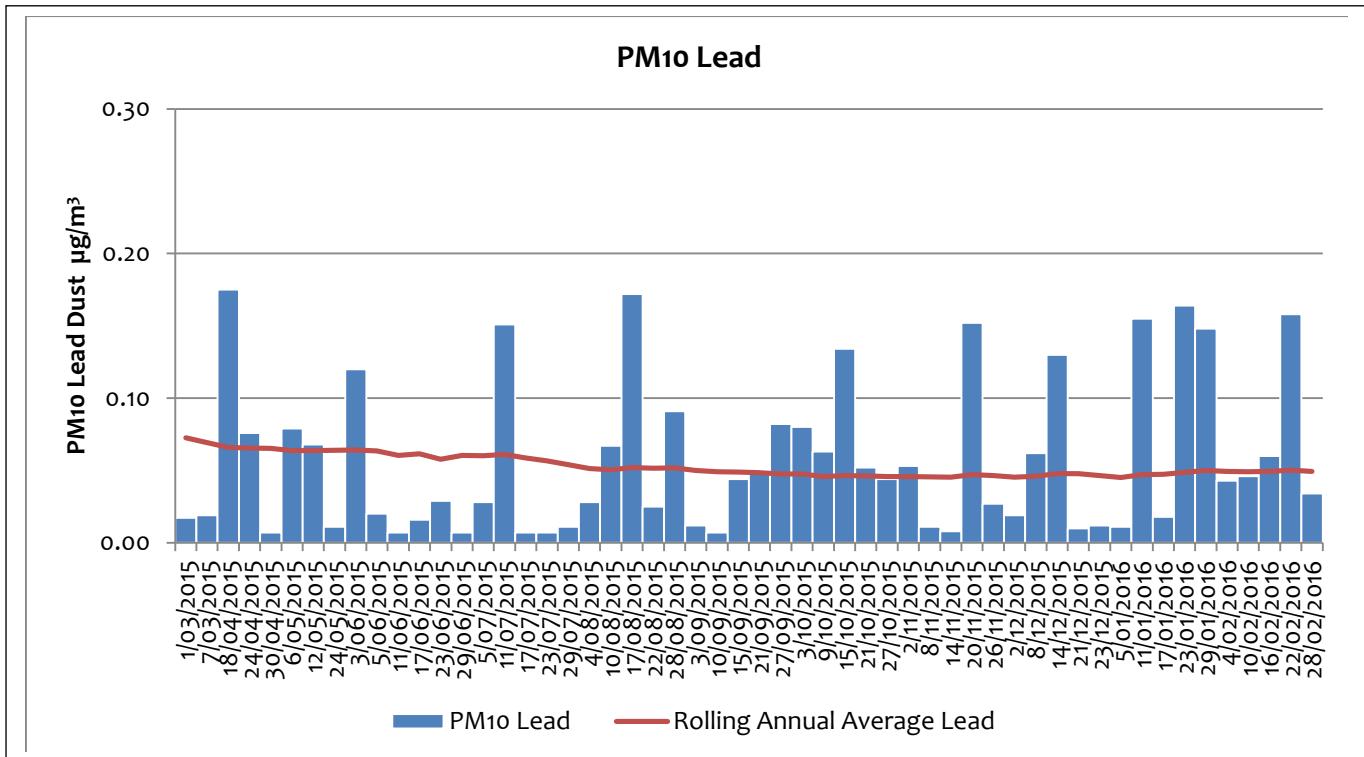

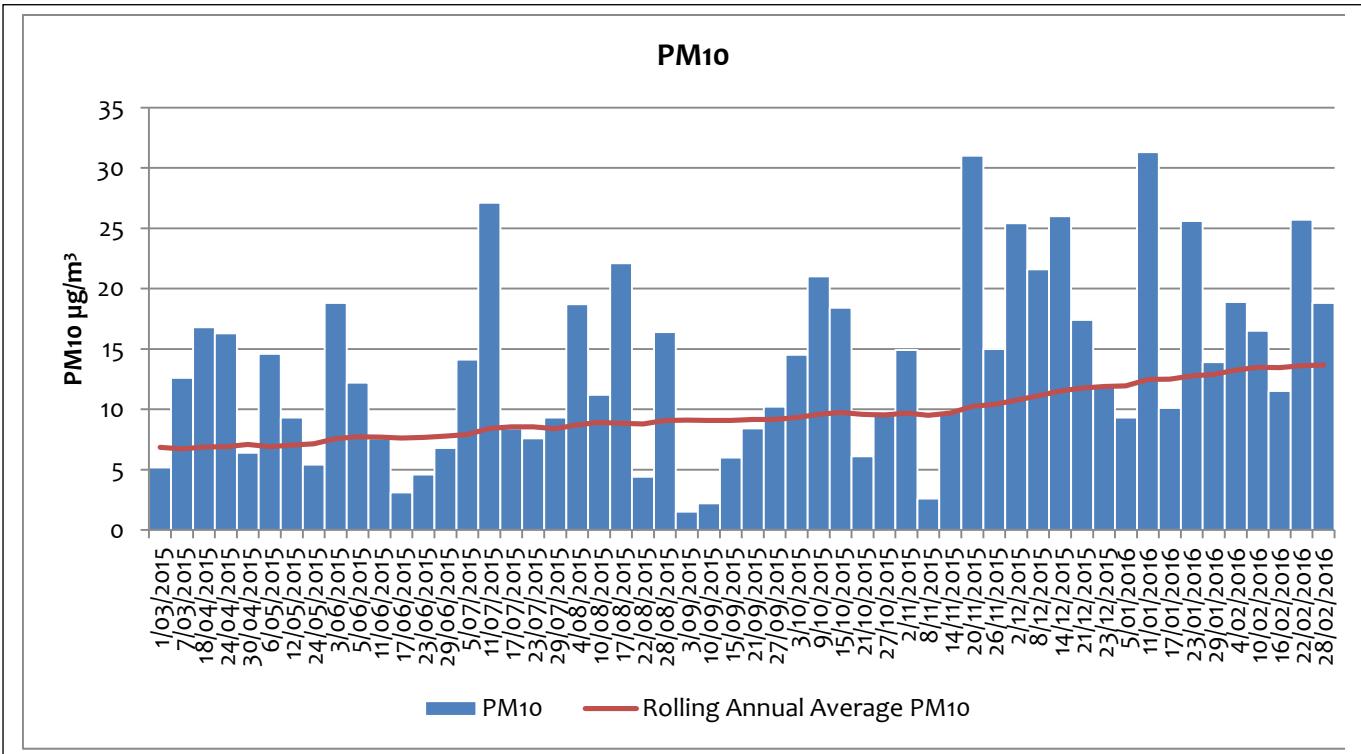

1. Spike on the 18<sup>th</sup> April was investigated. Lab QC was okay with no evidence of lab contamination. Wind conditions were not extraordinary and it rained. Field sampling methods have been checked to prevent any sample contamination. The spike on the 11<sup>th</sup> July also occurred when conditions were considered normal with 15km/h winds from a SE direction. Lab QC was okay, this may have been due to earthmoving activity (grading) in the local area. The spike on the 20<sup>th</sup> November coincides with 70kmh gusts coming from a westerly direction. On the 11<sup>th</sup> January gusts were recorded up to 65km/h in a WSW direction.

2. Spike on the 18<sup>th</sup> April was investigated. Lab QC was okay with no evidence of lab contamination. Wind conditions were not extraordinary and it rained. Field sampling methods have been checked to prevent any sample contamination.

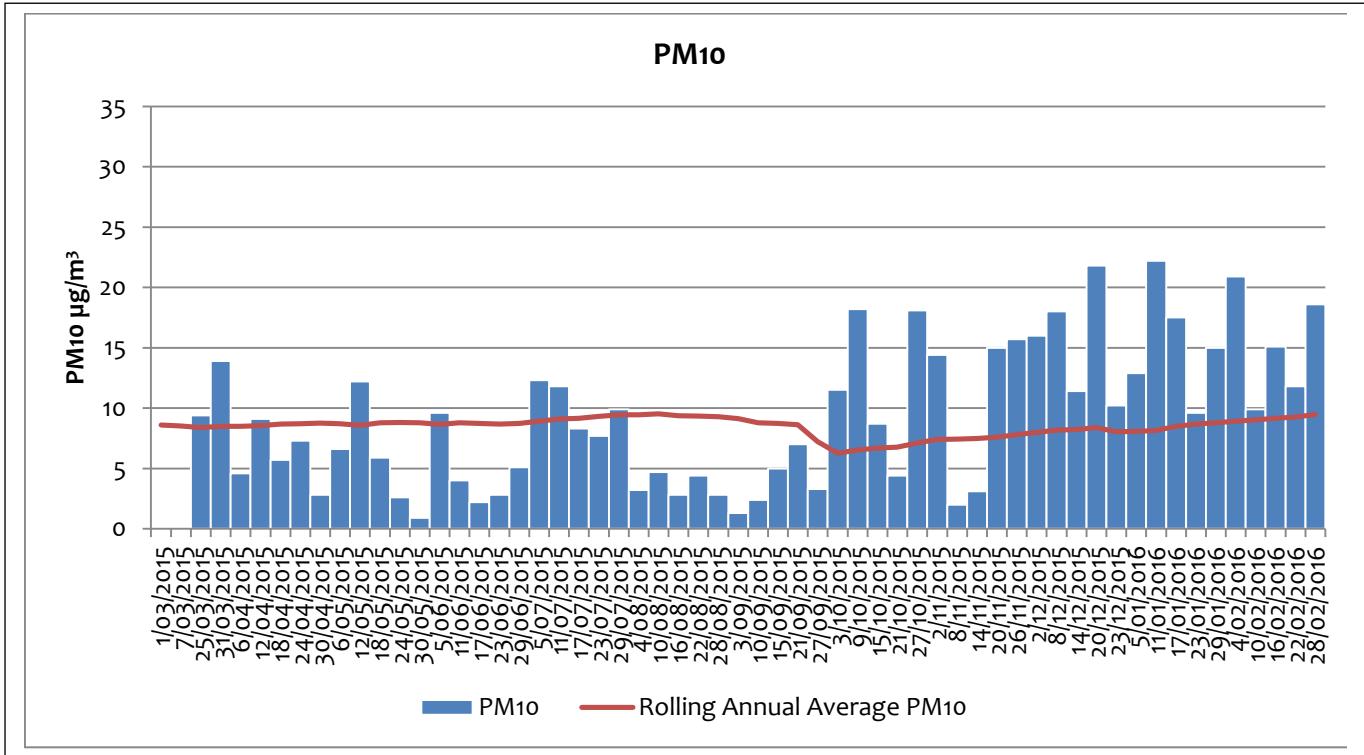

### EPL11 - Silver Tank - On Site

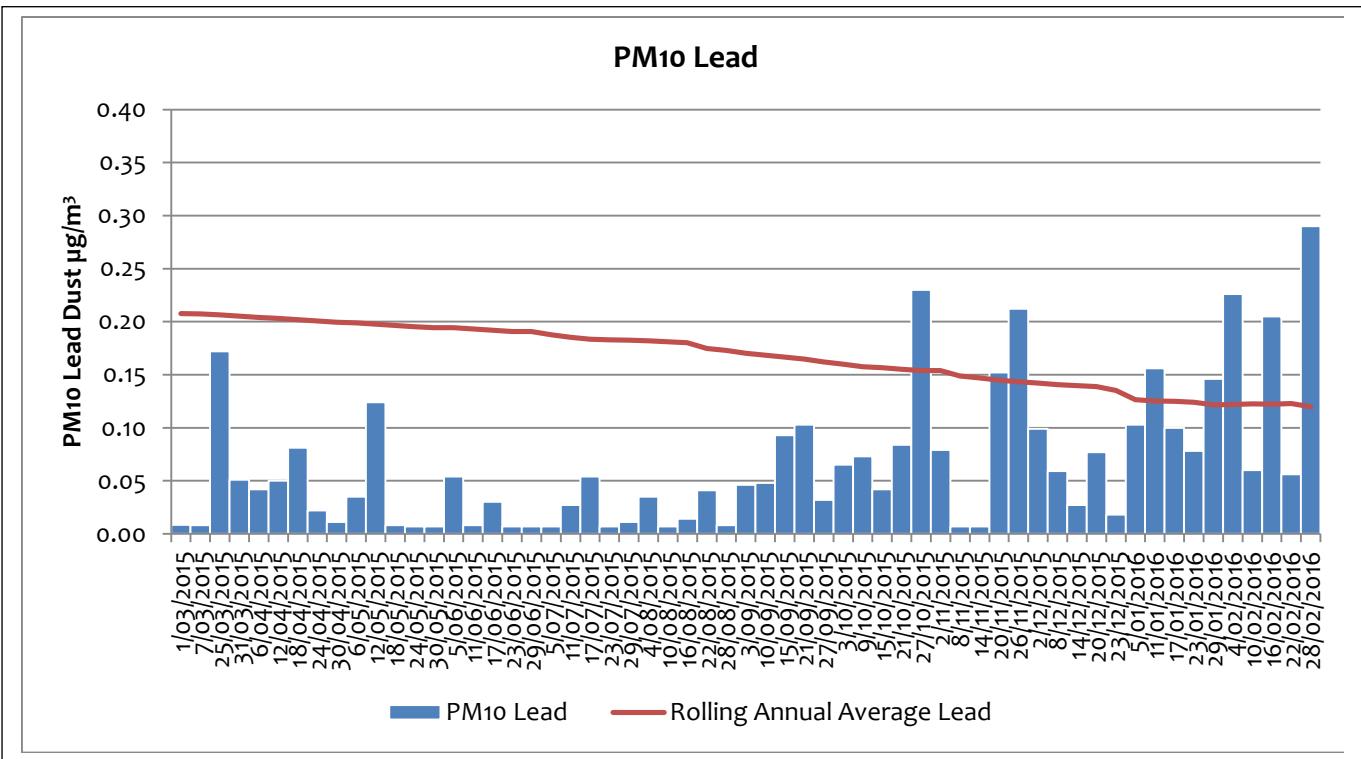

DATE	PM10 ( $\mu\text{g}/\text{m}^3$ )	Lead ( $\mu\text{g}/\text{m}^3$ )

## EPL13 – Essential Water – Off Site

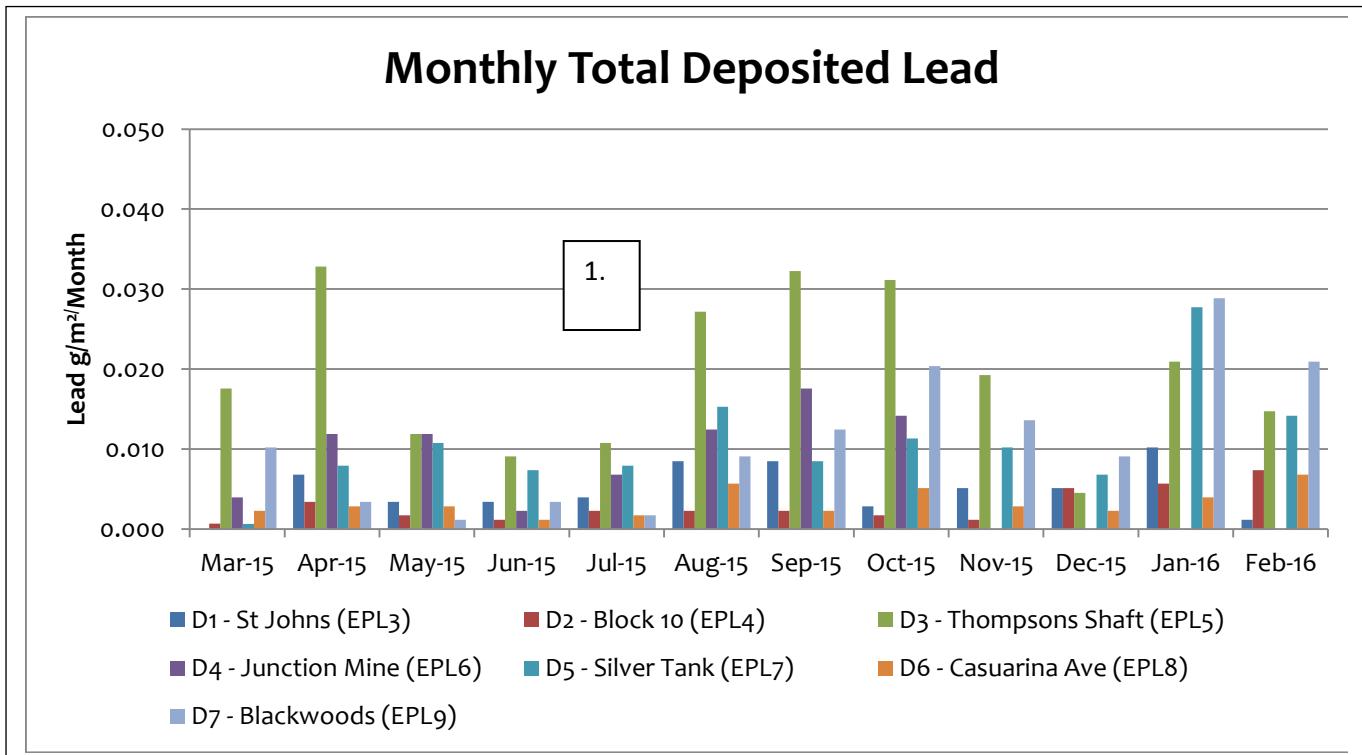

### 1.3 Dust Deposition Sampling

Total Deposited Dust (g/m <sup>2</sup> /Month)							
Date	D1 (off site)	D2	D3	D4	D5	D6 (off site)	D7
Feb 2016	0.28	1.02	1.58	2.09	1.98	8.71	1.92
Background Average	4.0	3.1	4.3	5.7	n/a	5.8	n/a

1. Samples at Casuarina Ave appear to have been tampered with in March 2015. This sample had a large volume of water present when collected.
2. When the sample was picked up the sample stand had been relocated within the back yard of the residence. The resident was asked to move the stand back to its original location. Contamination from a nearby greenhouse is suspected.

Total Deposited Lead (g/m <sup>2</sup> /Month)							
Date	D1 (Off Site)	D2	D3	D4	D5	D6 (Off Site)	D7
Feb 2016	0.001	0.007	0.015	0.000	0.014	0.007	0.021
Background Average	0.0000	0.001	0.0018	0.0040	0.0010	0.0020	0.0100

1. Samples at Thompson's shaft spiked in lead concentration in April, August and September. Nearby vegetation and buildings have been identified as potential sources. Nearby vegetation was removed in September and October. A clean up of the haul road adjacent Thompsons shaft was carried out in September. The haul road will continue to be monitored. Further investigation is required with regard to nearby buildings, it is suspected the paint on the buildings contains lead and is in poor condition. There is also exposed remnant ore body at the surface in this location which may also contribute as a slightly higher than background influence. The dust bottle location was moved approximately 10m away from the buildings and has delivered a lower total deposited lead reading for December however levels are slightly higher again in January. Notably Silver Tank and Blackwood's were higher than normal. Essential Water were performing earth works near the western boundary of the site during January which may have contributed in some way. Additionally some lead containers were cleaned during January at the rail load out. This not an activity normally conducted on site and involves breaking up of consolidated concentrate in the bottom of the lead containers. This has probably contributed to both the higher levels at Blackwoods and Thompson's shaft.

## **2 Blasting (Vibration and Overpressure)**

**Note: Vibration is recorded in Peak Particle Velocity (ppv), Overpressure is recorded in Decibels (dB)**

Block 7 will not have 12 months of data until May 2016, therefore no calculation on percentage of blasts over 5mm/sec can be given (it is based on an annual calculation).

### **February Summary Block 7, Zinc Lode:**

- 2 production firings
- 16 development firings
- 1 Blast recorded a ppv of >3mm/s
- 0 Blasts recorded a ppv of >10mm/s
- 0 Blasts recorded an over pressure level over 115dB
- 0 Blasts recorded an over pressure above 120dB

### **February Summary Rest of Mine, Western Mineralisation and Main Lode:**

- 8 production firings
- 111 development firings
- 0 Blasts recorded a ppv of >5mm/s
- 0 Blasts recorded a ppv of >10mm/s
- 0 Blasts recorded an over pressure level over 115dB
- 0 Blasts recorded an over pressure above 120dB

### **12 Month Summary Rest of Mine, Western Mineralisation and Main Lode:**

- % of all blasts over 5mm/sec = **0.39%** (licence requirement <5%) calculated from 1st March 2015 until February 29, 2016.

### **3 Noise**

Quarterly noise monitoring is now complete as per the Pollution Reduction Program (PRP) on EPL 12559. Four noise assessments have been undertaken since November 2014. EMGA Mitchell McLennan Pty Limited (EMM) completed the analysis for all assessments.

A final summary report was produced by EMM for submission to the EPA. A licence variation was been sought from the EPA and the PRP was removed from the licence on 18/3/2016.

Future noise monitoring will be undertaken as per the NSW Industrial Noise Policy.

## 4 Water

### 4.1 Ground Water Sampled 10/2/2016

## 4.2 Surface Water

Insufficient rainfall for opportunistic surface water sampling during December 2015

### ***Surface Water Table Nov 2015 to Nov 2016***

---

EPA Identification Number	Frequency	Comment
EPL29	2 x Per year when contains water	No sample - dry
EPL30	2 x Per year when contains water	No sample - dry
EPL31	2 x Per year when contains water	No sample - dry
EPL32	2 x Per year when contains water	No sample - dry
EPL33 Horwood Dam	2 x Per year when contains water	No sample – low water
EPL34 Upstream	2 x Per year when contains water	No sample - dry
EPL35 Downstream	2 x Per year when contains water	No sample - dry

## 5 Weather Data

BHOP – Automatic Weather Station was unavailable for June. The new weather station was installed on June 15. The weather station continuously monitors the following parameters as per point 55 of the Environmental Protection Licence.

### POINT 55

Parameter	Sampling method	Units of measure	Averaging period	Frequency
Temperature at 10 metres	AM-4	degrees Celsius	15 minutes	Continuous
Wind Direction at 10 metres	AM-4	Degrees in a clockwise direction from True North	15 minutes	Continuous
Wind Speed at 10 metres	AM-4	metres per second	15 minutes	Continuous
Rainfall	AM-4	millimetres	1 hour	Continuous
Sigma theta	AM-2 & AM-4	Degrees	15 minutes	Continuous

The continuous data can be viewed at any time at the following web site using the username and password.

[www.loggermonitor.com/login](http://www.loggermonitor.com/login)

user: CBHAdmin

pass: brokenhill

Summary reports for all licence parameters are available from the website however due to the 15 minute data being very large daily summary data was also obtained from the Bureau of Meteorology Broken Hill on the following page:

Date	Day	Temps		Rain mm	Evap mm	Sun hours	Max wind gust			9 am						3 pm
