

Owner Update – 10-19-22

The Restoration Company are starting to work on units:

2198

2206

Coming up next and quickly will be:

2190

2182

If your garage is full, please call someone right away you know who can move the contents to the middle of the garage and the middle of each room, it will then be bagged and covered.

If your drawers, cabinets, furniture have your personal items please call someone or if you are here to remove the contents to the middle of the room or dispose of if you don't want.

The workers are being bogged down by having to do this and it is the **owner's responsibility** to remove their personal items.

They will be bagged in the middle of the floor to keep safe.

If you do not do this and the workers have to do it, there is no guarantee nothing will get broken.

It is not their responsibility to clean out your condo.

If you have furniture or other items you want to dispose of, please have someone you know do it or if you are here you can move to the side of your condo. The workers will throw them in the dumpsters (this is saving us a lot by not having to wait for the county...who knows when they would come).

Remember all cars have to be out of the garage also to be able to work.

The company is on a fast track to get us back in our condos as soon as possible, and these things mentioned above are taking them more time as it is **your responsibility as the homeowner**.

Thanks for your understanding and help in this time of crisis for our community.
