

Owner Update 11/04/22

In order to keep the remediation and renovation at the association running smoothly, any unit owner hiring their own contractor must have the contractor provide their license, insurance, and a list of what they intend to do and the timing to the Board. The Board can attempt to coordinate the work/timing between the unit owner contractors and the association on-site contractors.

Unit owners and contractors are proceeding without knowing what our on-site contractors are doing and there have been conflicts.

Thank you.
