INCELLDERM

Q1

**MY SKIN
FEELS
TIGHT
AND DRY**

When the products are in the process of being absorbed into the skin and as your dermis gets filled with rejuvenated cells, there might be a confusion between the inner tightness and the outer tightness.

As your skin condition improves, the tightness (dryness) will eventually disappear. If your body is lacking water, you will experience more dryness. Hydrating yourself will help with easing the tightness of the skin.

Recommended Use

Use the oil mist to help ease the tight feeling.

Change the Order of Use

oil mist - balancing gel - booster - serum - booster - balancing gel - cream

In case of extreme dryness and tightness, decrease the amount of booster.

Q2

**MY SKIN
FEELS
HOT AND
BURNING**

Keep the balancing gel refrigerated and apply thick layer almost as a mask.
In case of burning and stinging, reduce the amount of booster.

The booster contains amino acids and various patent ingredients that maintain your skin balance. These ingredients get absorbed into your skin and help with whitening and wrinkle improvement.

If you have dry skin, the active ingredients get absorbed faster so the burning may continue for a little longer.

Recommended Use

Spray the oil mist as much as needed.

Q3

**MY SKIN
IS
ITCHY**

As the active ingredients are delivered to the dermis, the capillaries will stimulate. The itchy reaction may occur in the beginning of the use of the products.

*If you have grass allergies, millet acne may appear immediately after the use of the products and may cause itchiness. Stop using the balancing gel if you have grass allergies.

Recommended Use

Adjust the amount of active cream.
Use the balancing gel to calm and hydrate your skin.

Q4

MY SKIN STINGS

If you have extremely dry skin, wash your face just with water in the morning.

oil mist - balancing gel - serum OR serum - booster - balancing gel - cream

Use booster according to the skin condition.

This is a reaction that can happen when the dermis is very dry.

When it is really dry, the lipid layers of dead skin collapses and the skin starts splitting. When the moisture gets into the splitted layer, it can cause the stinging sensation.

This is only a temporary reaction and can be eased by applying the calming balance gel . It will moisturize and calm the skin.

Recommended Use

Q5

MY SKIN BREAKS OUT

make rich foam using Active Cleanup Powder, leave it on for 3-5 minutes and then wash
Keep balancing gel in the refrigerator.
Apply on to the affected area for immediate calming effect.

This can happen due to many factors such as your physical condition, stress level, change in hormones, and pores blocked due to aged dead skin.

The toxins accumulated inside your skin will try to come out thus resulting in skin break outs. For acne skin, using Incellderm products will help with keeping pores clean and a good skin balance.

Recommended Use

Deep pore cleansing

Keep balancing gel in the refrigerator.

Q6

**I HAVE
FLAKY
DEAD
SKIN**

When you start using our products, your skin turnover time will become normalized and the dead skin cells rapidly move to the top. The aged dead skin that has been accumulated will be pushed up to the surface level.

This a very common reaction and as you use the products regularly, the flakiness will decrease and your skin will become smooth and soft.

Recommended Use

Spray the oil mist after washing your face.

Change the Order of Use

Oil mist-balancing gel – booster – serum – booster - small amount of the ex-cream

Foam mask with Active Cleanup Powder for twice a week is suggested.

Q7

**FEELING
PUFFED
UP AND
SWOLLEN**

Reduce the amount of cream and watch for any changes in reaction.

As you age, inside your dermis starts to empty out and because of the natural gravity, your skin will get saggy. When you continuously use our products, as the dermis is getting filled, your face may temporarily look swollen.

*If you are taking any medications (for high blood pressure, diabetes, and/or any vascular diseases) please consult the professional and adjust the amount of use.

* Use of medications, fillers, or liposuction may cause this reaction.

Recommended Use

Q8

**I SEE
MORE
WRINKLES**

Collagen and elastin absorbs into the dermis and as they activate, collagen starts spurting out like spider webs. Then, the boundary between the dermis and the epidermis becomes bumpy and wrinkles appear. These wrinkles are fake wrinkles so it will improve and disappear with continuous use of the product.

*Extreme dry skin, dry skin, taking diet pills, thin and sensitive skin, over usage of the cream may effect the reaction but with hydration and continuous usage, these wrinkles will disappear.

Recommended Use

Wash your face just with water in the morning for extremely dry skin.

Change the Order of Use

mist - balancing gel - booster - serum - booster - balancing gel - cream

Use one jar of the cream per day as a moisturization mask.

Q9

**DARKENED
SPOTS**

Freckles are made from melanocytes and they don't develop overnight. The spots you can see on surface are in your epidermis but there are ones hidden inside base layer, granular layer, and outer layer of your skin. Using Incellderm will help with normalizing the turnover cycle which will cause the melanocytes from the base layer to be pushed up to the outer layer quickly, making the freckles look darker.

With the continuous use of the products, healthy cells will develop and the freckles will become lighter.

Recommended Use

Apply Aqua Sun Gel and reapply it frequently. not sticky and does not turn cakey white on the skin and it is very moisturizing
Every skin type is different. Best result in 1-10 months.
