If this sounds good, **read on!**

Have you gained too much extra weight in your adult life? Were you of rather normal weight going into adulthood, but after starting your life - maybe adding job, spouse, having kids, a mortgage - you are now carrying 10, 20, up to 40 extra pounds that slowly crept up in unsightly places?

Do you no longer look your best? Do your clothes not fit the same? Are you also more tired carrying that extra weight, and that diminishes your appearance, stamina, and libido? Do you even feel your overall health is suffering? Have you tried other failed diet plans that cost too much to enroll, and had other expenses down the road? If this sounds like you, then we suggest that you try the Two-Step **AUTO-DIET** and "Lose-3-Pounds-A-Week-Minimum" - up to 40 pounds. Why? Because **IT WORKS!**
