

Craft Time Instructions

Paper Snake

1. Using construction paper or other paper available, cut ten 1 inch wide strips about 8 inches long.
2. Take one of the strips and fasten the two ends together to make the first loop. Fasten with glue, tape or a stapler(may need parent help).
3. Take remaining strips and connect them to the first loop by threading the strip thru the prior loop. Fasten each remaining loop with glue, tape or a stapler(may need parent help). Makes a chain.
4. Once chain is as long as you like or you have used all 10 strips, decorate with googly eyes, and glue on a little red tongue or color on a face. Have fun and decorate as much or as little as you want!
5. Have fun with your paper snake! Send us a picture of your creation!
