

The Basic Package provides a strong foundation for your aviation journey, combining theoretical understanding with practical exposure. It is an excellent option for individuals seeking to enter the aviation industry or enhance their existing knowledge and skills.

The **Basic Package** offers a comprehensive and valuable aviation training experience in the UAE. It includes the following key components:

1. Training and Career Consultation:

As a part of the Basic Package, you will receive professional training and career guidance from industry experts. Our team of experienced instructors will assist you in understanding the fundamental aspects of aviation and provide insights into potential career paths in the field.

2. 1-month face-to-face Theory Class in the UAE:

You will attend a month-long Theory Class conducted in person in the UAE. This classroom-based training will cover essential theoretical knowledge required for various aspects of aviation, including regulations, procedures, and industry best practices. It offers a conducive learning environment and allows you to interact with instructors and fellow students in real-time, promoting active learning and knowledge sharing.

3. 1-month Internship in the UAE with a provided UAE visa:

The Basic Package includes a one-month internship opportunity in the UAE, allowing you to gain practical experience in a real aviation setting. This internship will be arranged for you, and a UAE visa will be provided to facilitate your stay during this period. During the internship, you will have the chance to apply the knowledge gained during the theory class and work alongside aviation professionals, gaining hands-on experience and valuable insights into the industry's day-to-day operations.
