

ACADEMY OF MODERN  
IMPLANT DENTISTRY

# LEARN

with the

## Academy of Modern Implant Dentistry

and **Neodent®**

# Academy of Modern Implant Dentistry

## Fundamentals of Digital Implant Workflows

### DIGITAL LEVEL 1

Understand in-office digital implant workflows / Learn ways to acquire patient data / Utilize both surgical guide and prosthetic planning software / Apply 3D printing technology and using during live patient surgery

**\$4,750 | 24 hours CE | 2 days of lecture**

- Understand equipment and software required for implementing in-office digital implant workflows
- Learn to capture required patient data for accurate planning
- Learn to design surgical guides and prosthetics digitally
- Learn to 3D print, finish, cure and sleeve printed surgical guides
- Use the printed guides during the live patient surgery to show how accurate guided surgery can be

## Advanced Techniques in Digital Implant Workflows

### DIGITAL LEVEL 2

Understand in-office digital implant workflows for complex and fully edentulous cases / Ways to acquire patient data / How to use both surgical guide and prosthetic planning software / How to 3D print, finish guides and then use during live patient surgery

**\$4,750 | 24 hours CE | 2 days of lecture**

- Understand what is required to plan complex and fully edentulous restorative cases
  - Learn to create digital wax ups for accurate surgery and prosthetic design
- Learn to design complex surgical guides and prosthetics digitally
- Learn to finish, cure and sleeve in-office 3D printed surgical guides
- Use the printed guides during the live patient surgery to show how accurate guided surgery can be
- Attain knowledge of fabrication of scan appliances
- Understand how to avoid common errors made in digital implant dentistry

## Fundamentals of Implant Surgery

### LEVEL 1

Introduction to: Implant surgery / Bone grafting / Implant prosthetics with live patient surgery

**4,750 | 24 hours CE | 2 days of lecture**

- Anatomy and histology of hard and soft tissue
- Effects of systemic health and medications on implant surgery
- Flap design and suturing techniques
- Surgical implant placement protocols
- Prosthetic considerations of dental implants
- Socket preservation and buccal wall defect repair Internal sinus lifts
- Learn to handle common implant complications
- Patient screening and consultation
- Radiology preservation for implant surgery

## Implants in the Aesthetic Zone

### LEVEL 2

Introduction to: Guided implant surgery / Anterior implant placement / Immediate temporaries / Lateral ridge augmentation / Generation and maintenance of proper tissue architecture

**\$4,750 | 24 hours CE | 2 days of lecture**

- Understand workflow and surgical protocol for guided surgery
- Learn to properly place implants in the anterior region  
Fabrication of immediate temporaries and custom healing abutments
  - Generate and maintain proper tissue architecture  
Techniques for lateral ridge augmentations
  - Soft tissue grafting for superior implant esthetics
  - Implant prosthetics in the aesthetic zone
  - Lateral ridge augmentations
- Dental photography to achieve aesthetic restorations

## Implants for the Full Arch

### LEVEL 3

Full arch implant surgery, principles and techniques of immediate loading, full arch prosthetic options, maintenance of full arch implant restorations and patient management

**\$5,950 | 24 hours CE | 2 days of lecture**

- Implant surgical protocols for full arch treatment
- Learn to complete guided surgery
- Implant prosthetics for full arch treatment
- Maintenance of full arch prosthetics
- Treatment planning full arch cases
- Learn to immediate load and convert dentures

**Experience multiple live patient surgeries with each session!**

## DR. COREY RAYMOND

Dr. Corey Raymond originates from Salem, Ohio, but currently resides in Philadelphia. He graduated from Temple University School of Dentistry in 2014, where he received his Doctor of Dental Medicine. During Dr. Raymond's time at Kent State University, he studied chemistry and molecular biology, completing research in the use of nanoparticles to target cancer cells with various anti-cancer drugs.

After graduation, Dr. Raymond practiced in Cleveland, Ohio and Charlotte, North Carolina, where he developed new surgical approaches and 3D printing techniques for dental implant surgery. Now, less invasive and painful procedures can be achieved more efficiently and accurately with quicker healing process.

Dr. Raymond has taken this experience and has lectured for multiple companies across the United States on the most modern techniques available in dentistry.

The Academy of Modern Implants & Dentistry can offer significant cost savings on nearly all dental procedures while still using the highest quality materials.

In 2020, Dr. Raymond started The Academy of Modern Implants & Dentistry in King of Prussia, PA to offer patients an alternative to the traditional model of dentistry with significant

cost savings on procedures while still maintaining the highest quality materials. "My goal is to transform patients' ideas of procedures that are thought to be too expensive or too painful into real possibilities."

In Dr. Raymond's free time, you can find him on the golf course, playing guitar and piano, or hanging out with his two Great Danes, Walter and Howard.

INSTITUTE LEVEL	DATES	INSTITUTE LEVEL	DATES	INSTITUTE LEVEL	DATES
