2025 draft RTS

At European level, the adoption process of IFRS 18 and IFRS 19 are still ongoing. The endorsement of IFRS 18 is expected to be finalized by early next year, while IFRS 19 is anticipated to be adopted by mid-next year. Both standards are expected to come into effect for annual reporting periods beginning on or after 1 January 2027, with early application permitted.

To support the early digital adoption of IFRS 18, ESMA has decided to provide both applicable reporting options and to include both sets of elements into the ESEF taxonomy. This approach will enable preparers to get familiarized and begin applying the new standards in electronic format ahead of their mandatory effective dates.

Even though IFRS 18 has not yet been adopted by Europe and therefore not yet applicable for the ESEF reports, the AMF encourages companies to start assessing the impacts and prepare for the

entry into force of IFRS 18 in order to familiarize themselves with the new taxonomy structure and test it, before its actual implementation.

This document aims at summarizing the specificities of the IFRS 18 taxonomy for the **Statement** presenting comprehensive income, profit or loss and the mandatory disclosures.

The entry point:

The entry point to be used for accessing the IFRS 18 taxonomy is: ifrs_18_entry_point_2025-03-27.xsd.

Note that all elements are present in the 2025 taxonomy but, when using this entry point, the Statement presenting comprehensive income, profit or loss is in the role [330000] and the roles [310000] and [320000] are not present.

Note also that the names of the element have not changed but that the elements to be used in the IFRS 18 Statement presenting comprehensive income, profit or loss are those with a label that include the words: operating, investing, and financing.

The IFRS 18 Statement presenting comprehensive income, profit, or loss:

The structure of the statement is as follows:

The elements to be used to tag IFRS 18 statements have the same name as in the 2025 Full IFRS taxonomy, but the labels are different. They include the words: operating, investing, or financing for their correct classification in the statement.

For tagging purposes, it is necessary to refer to the labels of the elements.

New elements

The new elements in the IFRS 18 - Statement presenting comprehensive income, profit or loss include the words operating, investing, or financing in their names:

Extended elements for entity specific items – Best practices

Roll-forwarded extensions:

For extensions that are rolled-forward, their name may remain the same as before, but their label should be modified to include the words: operating, investing, or financing if they are correctly placed in the Statement structure.

New extensions:

For new extensions, their name and label should include the words: operating, investing, or financing as it is done in the base IFRS 18 taxonomy.

Wider anchors:

The wider anchors for entity specific elements should necessarily refer to elements that have a label that includes the words: operating, investing, or financing and are part of the same section of the Statement presenting comprehensive income, profit, or loss.

Other monetary elements in the taxonomy

There are monetary elements in other roles of the taxonomy that could be consider for tagging line items in the Statement presenting comprehensive income, profit, or loss:
