

## **Safety Environment and Health Policy**

Chisu International and all Chisu branch companies, are committed to Safety Environment and Health as follows:

We comply with all applicable laws and regulations regarding Safety and Health, and ensure all necessary Permits and Licenses available before any operation starts.

Chisu operates in a safe and responsible way by preventing harm to employees, costumers, visitors, the environment, and the communities we operate in.

Chisu guarantees health care for all employees

Chisu frequently trains all employees and related customers to reach the above-mentioned goals. Trainings in Safety, product knowledge, work related conditions and outbreak health threatening circumstances, e.g. Covid-19 regulations and prevention.

Chisu organizes in cooperation with Orica and the ADEK University of Suriname The Orica Safe and Efficient Blasting Training, the Advanced Blast Management Training Course and the Orica Cyanide Safe Use and Handling Awareness Training Course every 2 or 3 years. These trainings and courses are conducted by experts from abroad.

According to law and safety regulation all PPE (personal protective equipment) is provided and mandatory during work and beyond for all Chisu staff and visitors.

Full respect to our fragile environment is of high priority and required standards are complied. All incidents need to be reported immediately.
