

SAFETY

1. With Bellabee, we PRODUCE OUR OWN NATURAL BODY FREQUENCIES from 1 Hz to 135 Hz. Nothing atypical or unknown to our body. Most of the music and musical instruments in the world are tuned to 440 Hz, and our phones run at a speed of 40,000 Hz!
2. By measuring generated electro-magnet pulses, numerous objective tests have demonstrated that Bellabee works.
3. PEMF technology is not our invention, but WE HAVE HARNESSSED IT IN THIS UNIQUE, WEARABLE MED-TECH DEVICE. Research into PEMF has been conducted since the late 1950s by American, Japanese, Indian, and Chinese scientists and researchers. PEMF machines exist, but they are expensive and not customized for wide consumer use.
4. For generating electro-magnet pulses in our Bellabee headband, we use ENERGY FROM A SMARTPHONE WITH THE SAME POWER THAT GOES TO HEADPHONES when we listen to music. As producers, we have the complete spectrum of tests and certificates to guarantee that our product works and WORKS SAFELY.

DOES BELLABEE PRODUCE RADIATION?

Not. THERE IS NO RADIATION INCLUDED; BELLABEE does not produce waves; it electronically suggests how to perform by generating weak magnetic pulses in the body's natural known frequencies, no-invasive. USING ENERGY FROM A PHONE IS SAFE, ENOUGH POWERFUL, BUT STILL VERY MUCH WEAKER THAN ALL THE REST OF THE ELECTRONIC household equipment YOU USE AT HOME.

DOES BELLABEE PRODUCE “ELECTRO SMOG”?

Electrosmog comes from devices with particular field strengths and high frequencies. These frequencies can induce heat in tissue and potentially damage cells. Our technology is based on carefully selected low-frequency stimulation that is noninvasive, natural and does not create electrosmog. No worries.

HOW DOES BELLABEE WORK?

BELLABEE IS A DIGITAL METRONOME THAT YOU CONTROL, CHOOSING YOUR PREFERRED STATE OF MIND AND ALLOWING THE DEVICE TO SUGGEST HOW YOUR MIND SHOULD BEHAVE IN THE RHYTHM AT WHICH IT OPERATES. It's a personal assistant that coaxes our minds and bodies to work as we would like them to. The brain responds by synchronizing its own electric cycles to the rhythm that BELLABEE produces. With weak electro-magnetic PULSES, it gives you a beat and suggests a speed performance of your mind and body.

IS THERE ANY MEDICAL BACKGROUND?

BELLABEE draws upon the medical knowledge of the frequencies at which our brains work in different states of mind and encourages them to function at those exact frequencies. This can

be accomplished regardless of the fact that the brain frequency may not be aligned with what we are trying to achieve. In sleep and deep relaxation, our brains function from 1 to 2 Hz (beats) per second, while at high concentrations, they spike up to 40 Hz per second.

IS THERE ANY SIDE EFFECT IF WE USE IT TOO OFTEN?

There is absolutely no 'side effect' to this practice. With BELLABEE, we produce our own natural body frequencies, from 1 Hz up to 135 Hz. It is all-natural, nothing atypical or unknown to our mind and body.

Use it as much as you like, but only when needed.

MORE ABOUT MY BRAIN FUNCTIONS

Our brains and bodies run at different speeds depending on what we are doing. WHILE WE SLEEP, THE FREQUENCY IS LOW WHEN WE ARE RELAXED. WHEN CONCENTRATING OR WHEN PREPPED FOR STUDY OR CREATIVE THINKING, THIS FREQUENCY IS HIGHER. Problems arise when, because of upper impact interferences, your brain frequency is not aligned with what you are trying to do or to achieve.

WHEN THE BRAIN IS PRESENTED WITH A RHYTHMIC STIMULUS, SUCH AS A DRUM BEAT, FOR EXAMPLE, THE RHYTHM IS REPRODUCED IN THE BRAIN IN THE FORM OF THESE ELECTRICAL IMPULSES. If the rhythm becomes fast and consistent enough, it can start to resemble the natural internal rhythms of the brain, called brainwaves. When this happens, the brain responds by synchronizing its own electric cycles to the same rhythm. This is commonly called the Frequency Following Response (or FFR).

ARE THERE ANY SIMILAR STIMULI THAT CAN COMPARE TO BELLABEE FUNCTIONS?

Our mind reacts to every color, voice, sound, loved one, and dissatisfaction. Each of these external stimuli causes a sense of rippling in the brain. In the past, people used extremely low frequencies to achieve altered states of consciousness.

MEDITATION, ALONG WITH THE RHYTHMIC SOUND OF DRUMS, GONG THERAPY, AND STEADY FLASHING LIGHTS, ALL TRANSPORT YOU INTO A STATE OF THOUGHTFULNESS AND TRANSCENDENCE. EVEN THE SOUND OF ROLLING WHEELS WHEN RIDING A TRAIN CAN PUT US TO SLEEP.

DIFFERENT RHYTHMS OF MUSIC ARE A TICKING CLOCK; THEY ALL HAVE THEIR EFFECTS ON US. THE BRAIN ADAPTS TO THESE EXTERNAL FREQUENCIES.
