

GEA

Gea je personifikacija Zemlje i života. U antičkom svijetu bila je ishodište svega postojećeg. Danas, u vremenu klimatskih promjena i iscrpljivanja prirodnih resursa, podsjeća nas da priroda nije pozornica ljudske povijesti nego njezin temelj.

GAEA

Personifying the Earth and life itself, Gaia was regarded in the ancient world as the origin of all existence. Today, in a time of climate change and the depletion of natural resources, she reminds us that nature is not merely the stage on which human history unfolds, but its very foundation.
