

Why swear allegiance to this idiot?

It's time to grow up, Britain!

"King" Charlie the Brainless makes 30 million pounds a year for doing nothing. And he officially owns the whole country, which was worth over twelve trillion pounds last year. Meanwhile, 14 million of us struggle in poverty, including 4 million of our children!

This cruel and stupid arrangement can't be changed under the present system. Every cop, politician, and judge is the sworn servant of Charlie Boy, not you or me. Their corrupt Old Boys' Club has sold out our country and turned Britain into a police state.

It's time to get rid of this whole mess. Some of us have started to do so.

A new, grassroots Republic is forming across Britain: the sovereign Republic of Albion. We the People are reclaiming the nation with our own local assemblies, common law courts, and sheriffs. We are passing and enforcing our own laws. We're keeping taxes in our communities and taking back the wealth of the country for everyone.

Become a Republic citizen and govern yourself free of "crown" tyranny!

What is the Republic of Albion?

It is a new society growing up within the shell of the old.

Citizens are united in local Republican Assemblies that replace the existing government structures of the "United Kingdom". These Assemblies are legislative bodies where all people can introduce, debate, and enact laws in their own communities. These laws are enforced by common law courts and Sheriffs elected by the people.

This process of returning power to the people will span years but it starts today when at least twelve men and women sign a Charter to establish a Republican Assembly. These local Assemblies will send delegates to a Constitutional Convention to create a new nation.

Experience shows that many people are not ready at first for self-governance, and so those citizens who are need to be organized in local Republic cell groups that act as catalysts for change. The Republic cells educate and mobilize more people to defend their liberties and take back the land and the wealth of the nation.
