

# MARICOPA SOLAR & STORAGE PROJECT

500kV Transmission Line

Informational Sheet No.1

## FAST FACTS ABOUT THE PROJECT

- Key characteristics of the proposed 500kV transmission line:
  - Approximately 7 miles within an approximate 165 foot right-of-way
  - Constructed on monopole structures (150-180 feet tall)
  - Structures spaced 600-1000 feet apart
  - Construction will begin as early as Autumn 2023
- Transmission line will transmit electricity from the solar array to the APS Delaney Substation
- A Certificate of Environmental Compatibility (CEC) will be filed with the Arizona Corporation Commission (ACC) in Spring 2022
- Four alternative transmission line routes are currently being evaluated
- The proposed project is being developed to support renewable energy development in Arizona

Attend the Virtual Public Meeting!  
See reverse for more details

Dec. 14, 2021 6-7PM AZ Time

## Certificate of Environmental Compatibility Schedule

ACC = Arizona Corporation Commission

## GET INVOLVED & STAY CONNECTED!

For information about the upcoming virtual public meeting, to complete a survey or **submit a comment**, please visit the project website:
