

The disastrous overreach, misguidance and failures of the World Health Organization (WHO) demonstrated in the COVID “Pandemic” must never be allowed to occur again. We must learn the lessons of the COVID “Pandemic” and address the cataclysmic misbehavior of WHO and our national health agencies which failed in their duties by refusing to address the benefits of any approaches other than unscientific and disastrous lockdowns, masking and experimental vaccine recommendations and mandates.

As explicitly and repeatedly noted in the official WHO International Health Regulations Review Committee (IHRRC) Final Report¹: **“The obligations set out in paragraph 1 of this proposed new Annex appear to be absolute and unconditional.”** (page 89); **“This Committee is concerned that these proposals may unduly impinge on the sovereignty of States Parties and give binding effects to what are supposed to be recommendations.”** (page 68). WHO is now seeking to amend the International Health Regulations (IHR) and transform itself from an advisory body to a controlling one, threatening not only health, but personal and national sovereignty. It should be noted that this *immediate* threat is separate from, and prior to, any discussion of a so-called ‘Pandemic Treaty’ or ‘Accord.’

The IHR were originally created to facilitate information sharing and international health measures through advisory procedures in “an increasingly connected world.” WHO is in the final stages of implementing more than 300 amendments - all of which have been developed and negotiated in secret. They are slated to be considered at the World Health Assembly in Geneva (May 21-23, 2023). In addition to removing all references to human rights and dignity, these proposed amendments fundamentally alter WHO from an advisory body to one whose legally binding, absolute dictatorial powers would control virtually every aspect of national and personal life by hijacking control of all health care production and distribution, travel, personal data and more.

Under these proposed amendments, all authority for these decisions will be vested in a single person, WHO’s Director-General, giving him/her absolute, unchallengeable power to eliminate national and personal sovereignty and surveille at a previously undreamt-of level of intrusion and control. Those powers would extend to travel and freedom of movement, health, manufacturing and other economic activity, forced medical treatments, digital IDs/Health Certificates and more.

As stated in the WHO IHRRC Final Report²: **“This proposal also renders mandatory the temporary and standing recommendations addressed under Articles 15 and 16.”** (page 55); **“The proposed amendment to include a reference to temporary and standing recommendations seems to make application of these recommendations obligatory.”** (page 67).

The revised IHRs *do not require* national ratification since our country is already a party both to

² Ibid

WHO and the IHR. The proposed “Pandemic Treaty” or “Accord” might also be exempt from national ratification but the issue at hand is the disastrous proposed IRH amendments.

If approved by a simple majority of the 194 member nations of WHO, ALL member nations will be bound by the powers granted to the WHO Director-General under the proposed amendments unless we exercise our explicit right of rejection within the allotted time. **It is essential to note that NON member nations are NOT so bound.**

People around the world are demanding that their countries leave the WHO and its parent organization, the UN, and oppose the proposed secretly negotiated amendments during the upcoming World Health Assembly³.

The proposed alterations to the existing IHR are deeply alarming.

For example, a proposed change to Article 3 eliminates the existing language “**with full respect for the dignity, human rights and fundamental freedoms of persons.**” Article 3 articulates the guiding principles and limitations of the IHR, so the omission of these terms is absolutely egregious.

The amendments transform IHR *guidance* into forced *compliance* by all *member states*.

According to the official WHO IHRRC Final Report⁴: “**The proposed amendments to these definitions could be understood as aiming to change the nature of these recommendations from non-binding to binding, and giving a binding effect to WHO recommendations and requests as proposed in other articles.**” (page 26).

WHO’s corrupt and dangerous reality bears little resemblance to the benevolent image broadcast to the public. The current Director-General, Tedros Adhanom Ghebreyesus, to whom the proposed amendments transfer virtually unlimited unilateral power, has a disturbing background prior to his tenure at WHO, including culpability for the well-documented genocide of more than one million Ethiopians.

WHO’s funding structure makes it clear that it is fundamentally compromised, serving the special interests of its institutional and commercial funders, from whom the bulk of its income derives.

Importantly, WHO has publicized its plan to “introduce 500 new vaccines”⁵ by the year 2030 which, in addition to all existing vaccines, will be *mandatory* for every man, woman and child on

³ see for example <https://preventgenocide.org>

the planet. In addition, WHO seeks to implement total control over every living organism under its so-called “One Health” program.⁶

Given the language in the IHR amendments, *member states* would be *compelled* to implement vaccine and all other WHO / IHR mandates or face penalties for their non-compliance. These directives would supersede any existing laws protecting the rights of citizens in *member nations* and the sovereignty of these nations. In order to prevent the end of national and personal sovereignty, we must reject these amendments and withdraw from both WHO and the IHR.

Your vigorous participation in bringing this information to public awareness and spearheading our withdrawal from both of these organizations is essential. As a political leader, you are in a uniquely powerful position to act quickly to protect our nation, our citizens and to prevent world health tyranny.
