

Dear Dr. Paul,

Thank you for your continued advocacy protecting national and personal sovereignty by urging withdrawal from the United Nations and the World Health Organization.

In your recent communications you have warned against the upcoming “Pandemic Treaty.” This Treaty is in fact a decoy to deflect attention from the far more immediate threat posed by the proposed amendments, negotiated in secret, to the International Health Regulations (IHR), slated to be considered at the World Health Assembly (WHA) this May.

These proposed amendments accomplish everything that the ‘Treaty’ threatens to do and will require neither Congressional nor Executive approval nor ratification.

Among the proposed amendments is a provision to *remove* the requirement that all IHR actions must be consistent with “human rights and dignity,” replacing this language with a vague and undefined concept of “equity.”

Digital health certificates, impinging on virtually every aspect of our national and personal liberty, are also under consideration.

Prior amendments, adopted at last year’s WHA, are similarly damaging to our liberties and health freedom, and, while still subject to nullification by our government, are being allowed to come into full force virtually unnoticed by the public.

It is urgent that Freedom Advocates clearly understand the critical distinction between the dangerous and invasive WHO IHR Amendments and the forthcoming “Pandemic Treaty.” All of the dangers you correctly reference in the Treaty would in fact be accomplished by the adoption of the proposed and pending amendments to the IHR, making the Treaty mere window dressing. This is clearly articulated in the Declaration signed by the Heads of State on November 21, 2022 at the G-20 Meeting in Bali.

Your recent communications indicate that you have conflated these two attacks on our health freedom. Absent active rejection of the IHR proposed and pending amendments, they will become “legally binding on all member states.”

We agree completely with your understanding that withdrawing from both the WHO and the UN is critical and support that position at www.PreventGenocide2030.org.

I am writing to urge you to review this information and revise your position on this issue. Your voice is a powerful and respected one, Dr. Paul. We need you to share this information with your many supporters so they can focus on the immediate threat of the proposed and pending amendments to the IHR.

Natural Solutions Foundation (of which I am a Trustee) has established a campaign and series of Action Items which people can use to tell their representatives to act now to prevent health tyranny. Please share this link with all your circles of influence.

<https://preventgenocide2030.org/action-items>.

Thank you for your leadership in the Freedom Movement. Your attention to this situation will have a profound impact on our future.

Regards,

Ralph Fucetola JD
