7 Steps to Being a **FIRED UP!** Employee

PROGRAM DESCRIPTION

The top companies in the world already know that happier employees can literally transform the culture and climate of the workplace. But did you know that happier employees actually are 50% more productive — translating to greater efficiency and a healthier bottom line?

But it is not easy to always be happy and fulfilled with our lives and our work. At times we just need to be realigned with our purpose and reconnected with our team, rejuvenated mentally and physically and refocused on our personal and professional mission. In other words, we need to get **FIRED UP** again!

In this presentation, the following questions will be posed:

- What specifically needs to change for you to become happier and help your team members to be happier?
- What gets you and your team FIRED UP?
- What would it take for you, or any of your team members, to become proactive and start instigating positive change and growth both personally and professionally?

I will help you answer these questions in a fun, engaging, and interactive way. I will help you discover just how easy leaders can help the people they lead become more empowered, self-motivated and even take on more responsibility and do the same for themselves. I will also show how to build loyal and more connected relationships with your team members with simple strategies that all people can do regardless of personality or temperament.

What You Can Expect:

This message will be filled with positivity and reality. My presentation is interactive, engaging, inspirational, and packed with practical and researched-based content to get you and your team working with more energy and greater enthusiasm. This message is straightforward.

I believe work is not always easy, you don't always get what you want, working with others is challenging and takes understanding. My experience is that our honest authentic selves are enough to do the job with excellence and if we are willing to work on ourselves and learn to understand others, we can make a huge difference in our workplace, and in our world.

This program will be fully customized to meet your businesses specific needs.

FIRED UP Principles:

- **Fuel** - Remember WHY you do what you do
- **Inventory** - Take stock of what is working and what needs improvement
- **Reframe** - Turn setbacks into opportunities and how to change the way you see things
- **Energize** - Health and Wellness strategies for even the most overwhelmed employee
- **Declare** - Goal Setting for advancement and improved customer service
- **Understand** - How to connect with the people you lead and work for
- **Present** - Being in the moment and presenting your best you, inside and out, everyday

FIRED UP for Success Learning Objectives:

- Learn how to create a personal mission statement and reconnect to your purpose
- Ability to do a quick self-assessment of areas of improvement for yourself, your team and organization as a whole
- Learn Goal Setting and Time Management Strategies to maintain work life balance as well as performance, productivity and profits
- Implement Recognition and Rewards Techniques that are little to no cost that keep team members and your customers FIRED UP about your organization and its services

After this session, your team members will be able to take-away and apply specific techniques and practices in the following areas:

- Employee Engagement
- Customer Service/Loyalty
- Recognition/Rewards
- Motivation
- Leadership
- Communication
- Work/Life Balance

ABOUT ARIC BOSTICK

Over the past 23 years, Aric has been an Education and Corporate Speaker and Trainer. He has spoken to over half a million people at conferences, events, and school districts from coast to coast. His audiences include students, educators, principals, superintendents and parents at School Districts and National, State, and Regional Education Conferences. He has also been an Employee Engagement Speaker for Corporations and Human Resources Conferences throughout United States and Canada.

During the course of his education career, as a High School teacher and coach, he created and led a student leadership club that was featured on television for its success. As a national speaker he created a summer leadership camp, an online professional development course for educators, an online college readiness program for students, and a college readiness curricula for students.

Building on a professional interest in leadership and relationships in the workplace, He has spent the last several years studying an attachment-informed approach to leadership, drawing on the work of some of the leading academics in this emerging area of leadership theory and practice.

Background

Aric's 23 years in education and corporate leadership speaking and training can be seen as comprising three distinct phases:

School teacher (1998 to 2002) – During the first phase, starting in 1998, Aric learned what it was like to be a teacher and sports coach. During this time, he drew on his original teacher training, other specialist in-service training, and the support of more experienced educators and school leaders.

National speaker (2000 to 2018) – As a national speaker (Aric's 'Fired Up' program), he spoke to over half a million people (students, educators, HR Managers and corporate employees and executives) over an 18-year period. For this work, he drew on his own time in the classroom, an understanding of positive psychology (including CBT tools and techniques), and feedback from colleagues and clients. During this time, he became increasingly interested in the welfare of senior leaders in the corporate world and the welfare of school principals and superintendents in education, as well as the distinctive needs of educators in rural education settings.

Leadership trainer (2018 to present) – In 2018, Aric decided to combine his teaching and speaking experience with his interest in the welfare of education and corporate senior leaders, to create and start delivering a new range of training, based on the latest attachment and brain science (Aric's *Attachment-informed Leadership* program). Given his understanding of the distinctive needs of educational and corporate settings and their leaders (gained while working with them as a national speaker), he decided that he needed to strengthen the theoretical underpinning for his work. He did this by developing an understanding of modern attachment science (the quality and development of relationships over the life course), and interpersonal neurobiology (the neuroscience of attachment). During this time, he also started working with an attachment-informed leadership specialist.
